MOES WCM-J10-S 4MP Wi-Fi IP Camera

The MOES WCM-J10-S is an outdoor IP camera offering 4 MP (2304 × 1296) resolution, providing detailed monitoring both day and night. Equipped with a 9000 mAh battery and a 5 W solar panel, it guarantees long-lasting operation. Compatibility with the MOES, Smart Life, and Tuya apps enables remote viewing, settings management, and real-time event notifications.

Continuous monitoring and intelligent motion detection

The camera is equipped with human silhouette and motion detection, allowing it to effectively identify potential threats. If a person or unusual event is detected, the device sends a notification to the app and can trigger an audible alarm. Sensitivity adjustment allows you to tailor the system's operation to environmental conditions and reduce false alarms.

Color and infrared night vision

The WCM-J10-S model offers dual night vision modes—full color and infrared. Built-in lighting provides a clear, color image even after dark, while IR mode ensures a clear view in total darkness. The Anti-Flicker feature further improves image stability.

Remote communication and alarm functions

The camera supports voice communication via the app in one-way or two-way mode, allowing for remote conversations. The built-in siren and configurable alarms enhance security, while the messaging and notification features enable an immediate response to events.

Full image control and recording storage

Thanks to the PTZ function, the camera offers a wide range of motion—355° horizontally and 90° vertically—allowing you to monitor a larger area. Recordings can be saved to a TF card with a capacity of up to 128 GB or in the cloud (paid service), and features such as playback, gallery, and night mode are accessible directly within the app.

Durable construction and independent power supply

The IP65-rated housing ensures resistance to dust and harsh weather conditions, making the camera ideal for outdoor use. Power can be supplied via a USB-C port or a solar panel, which allows for continuous operation without the need for frequent recharging. This solution is perfect for monitoring your property, garden, or the area around your home.

Included

- camera
- solar panel
- screw pack x2
- user manual
- power cable
- mounting bracket x2
