

MOES WWP-BY-908 Wi-Fi 2-Channel Irrigation Pump

Model: WWP-BY-908-WH-EN

Manufacturer: MOES

EAN: 6974246470962

Product Code: 812723

R1,712

MOES WWP-BY-908 Wi-Fi 2-Channel Irrigation Pump

The MOES WWP-BY-908 is an advanced irrigation pump with two independent channels, allowing for precise management of watering in different plant zones. Equipped with two separate pumps (A and B), it allows each to operate individually or simultaneously, providing great flexibility in organizing your irrigation system. Thanks to 2.4 GHz Wi-Fi and Bluetooth connectivity, as well as support for the Tuya Smart and MOES apps, you can control the device from anywhere, set schedules, and monitor operating parameters in real time. The built-in LCD screen displays pump status, runtime, temperature, and battery and signal levels.

Dual Pump System and Flexible Control

The device is equipped with two independent pump modules that can be operated separately or simultaneously. This allows for watering different groups of plants with different settings, which works well both at home and in more complex systems. Additionally, physical buttons allow for manual control of the pump without interfering with operation, even when the device is connected to the app.

Smart control and automation

The pump works with the Smart Life app, offering remote on/off control and the ability to create watering schedules. You can precisely set the watering duration (in seconds) and frequency (in hours or days), as well as monitor the countdown of the active cycle. Support for Amazon Alexa and Google Home enables voice control, enhancing the convenience of daily use.

Automatic and manual modes

The WWP-BY-908 model offers an automatic mode that executes programmed watering cycles, and a manual mode that allows you to start or stop watering immediately. The pump selection feature (A, B, or A+B) lets you tailor operation to current needs, which is particularly useful when caring for different plants with varying requirements.

Powerful battery and long runtime

The device is equipped with a 2600 mAh lithium battery, which provides up to 4–5 days of operation in standby mode. Charging is done via a Micro USB port, and an optional 3M solar panel enables continuous recharging and increases the system's autonomy. This solution allows you to use the pump without needing to be constantly connected to a power source.

Clear display and monitoring functions

The built-in LCD screen also functions as a mini weather station, displaying temperature, humidity, and weather icons. Additionally, it shows information about Wi-Fi status, battery level, and pump and schedule activity, making it easy to monitor the device's operation in real time.

Practical solutions and wide range of applications

The pump is equipped with an inlet filter that ensures water purity and protects the system from contaminants. The compact design with multiple inputs and outputs allows for the creation of extensive irrigation systems. The device is suitable for various spaces, such as balconies, gardens, offices, or living rooms, ensuring convenient and effective plant watering.

Included

- Irrigation pump
- User manual
- Plugs x2
- Irrigation tips x8
- 10 m hose
- Spray nozzles x2
- Filters x2
- Mounting brackets x10
- T-connectors x10
- Hanger
- Solar panel

Manufacturer	Moes
Model	WWP-BY-908
Material	ABS + PC
Voltage	5.0-6.0 V
Charging method	USB / solar panel
Battery capacity	2600 mAh
Solar panel power	3.3 W
Pump capacity	550 ml/min
Dimensions	110 × 110 × 40.5 mm
