Thunderbolt 4/USB4 Class Pro Cable 240W with LCD (40 Gbps, 150 cm)

Model: TB4CBL150CMPRO

Manufacturer: I-TEC

EAN: 8595611708046

Product Code: 816083

R1,211

The i-tec Thunderbolt™ 4 / USB4 Pro Cable with LCD Display is a premium connectivity solution designed for demanding users and modern workspaces. Supporting data transfer speeds of up to 40 Gbps, display connectivity up to dual 4K/120 Hz or single 8K/60 Hz, and Power Delivery 3.1 up to 240W, it provides a single cable for high-speed data, video and power delivery.

Unlike most Thunderbolt cables that are limited to 80 cm or 100 cm, the 150 cm length offers greater flexibility and a more comfortable workspace setup. The durable braided jacket improves resistance to daily wear and frequent travel, while the integrated LCD display provides real-time monitoring of charging power, voltage and current. An ideal companion for Thunderbolt docks, professional notebooks, monitors and high-performance USB-C devices.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
