Model: 2082

Manufacturer: BISSELL

EAN: 011120237191

Product Code: 821450

R857

Water Filter

To get the best results from your steam cleaner, it’s important to care for the filter. BISSELL’s Vac&Steam water purification system removes harsh minerals and ions from tap water. For best results you can use distilled water. When the green beads in the filter turn blue, it’s time to replace it. Keep your Vac&Steam cleaning effectively by checking and replacing the water filter regularly!

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice.
