Sunnylife A3S-FI929 6pcs Mix Filter Set for AIR 3S

The Sunnylife A3S-FI929 filter set consisting of six different filters (MCUV, CPL, ND8, ND16, ND32, ND64) is an ideal solution for AIR 3S drone users who want to improve the quality of their recordings and photos. With the various filters included in the kit, you can easily adjust the parameters to the prevailing lighting conditions, reduce glare and control exposure. This is a kit that guarantees full flexibility and protection for your lens.

MCUV filter - effective UV protection

MCUV filter provides protection against harmful UV radiation, eliminating blue tinting of the image in intense sunlight conditions. Especially useful when flying at high altitudes or in mountainous landscapes. It improves the clarity and sharpness of images, while protecting the lens from dust and

minor mechanical damage.

CPL filter - eliminating reflections and improving contrast

The CPL polarizing filter eliminates reflections created on reflective surfaces, such as water, glass or metal. It makes colors more saturated, sky blues deeper and contrast clearer. CPL is an ideal tool for landscape photography to get clean and professional shots even in difficult conditions.

ND filters - exposure control and creative possibilities

Four ND filters are included: ND8, ND16, ND32 and ND64, which reduce the amount of light entering the lens by various amounts. ND8 reduces light by 3 degrees, ND16 by 4, ND32 by 5, and ND64 by as much as 6 degrees. With it, you will avoid overexposure on sunny days and gain full control over exposure. ND filters also allow you to use a long shutter speed, allowing you to create effects such as water motion blur or light streaks.

Robust construction and lightweight materials

Each filter is made of high-quality optical glass and a sturdy aircraft-grade aluminum frame. The filters weigh just 4 grams, which minimizes strain on the drone's gimbal and keeps shots stable. The anodized surface provides scratch resistance, and the multi-layer coating effectively protects against water, oil and dirt.

Easy installation and practical case

Sunnylife A3S-FI929 filters can be quickly and easily mounted on the drone's camera. It also comes with a compact, rugged EVA-lined case to protect the filters during transport. This practical solution allows you to always have the right filter on hand for any situation.

Included

- Mixed filter set of 6pcs: MCUV + CPL + ND8+ND16+ND32+ND64
