The compact M705D is a tower cooler with double fan from the A+ series. It has five extremely powerful black heat pipes, which dissipate 220W of waste heat to the countless cooling fins and thus predestine it for potent multi-core processors.

Due to the direct contact of the heat pipes, the heat transfer between CPU and cooler is extremely efficient and very even. Suitable for cooling processors with very high levels of waste heat.

The multi-socket means that the cooler can be used on all current Intel and AMD sockets.

In addition to the double heat sink and the two PWM-controlled 120mm fans, the scope of delivery includes a holding module for the LGA socket

LGA1700/1954/2066/2011/1151/1150/1155/1851/1156/1200 and AMD AM4 / AM5 illustrated assembly instructions and a tube of thermal paste.

- Elegant black design with top cover
