Our new flag ship in the field of air cooling from the performance X series - the M906

It has six extremely powerful black heat pipes, which dissipate 250W of waste heat to the countless cooling fins and thus predestine it for potent multi-core processors.

Due to the direct contact of the heat pipes, the heat transfer between CPU and cooler is extremely efficient and very even. The multi-socket means that the cooler can be used on all current Intel and AMD sockets.

In addition to the double heat sink and the PWM-controlled 120mm FDB Xilent fan, the scope of delivery includes a holding module for the

LGA1700/1954/2066/2011/1151/1150/1155/1851/1156/1200 and AMD AM4/AM5, illustrated
