

Imou Ranger Dual 10MP IP security camera Indoor 2880 x 1620 pixels Desk

Model: IPC-S2XP-10M0WED

Manufacturer: DAHUA TECHNOLOGY

EAN: 6976391037618

Product Code: 824296

R2,137

Imou Ranger Dual 5+5MP

The Ranger Dual 5+5MP is a state-of-the-art indoor security camera, designed to provide full coverage of a living environment. The camera features a rotating 5MP lens and a fixed 5MP lens to capture every angle of an indoor space. Furthermore, the Ranger Dual 5+5MP features advanced AI detection thanks to Imou Sense. This not only detects people, but also pets and abnormal noises. The Full Colour night vision technology ensures optimal security even in the evening hours. Moreover, the Ranger Dual features two-way talk and a built-in siren to deter inappropriate visitors.

2-zone security

Thanks to its double lens, the Ranger Dual secures 2 zones at the same time. The rotating lens can rotate up to 355° and tilt up to 90°. Upon detection, the lens automatically follows the movement.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The fixed lens provides a wide field of view and can be manually rotated. The combination of the lenses ensures full coverage of an indoor area, experience optimal peace of mind.

Image quality

The 3K, or 5-megapixel, resolution of both lenses show crystal-clear, high-quality images. At the same time, the H.265 image compression technique ensures that high-quality recordings and streams take up relatively little space and thus require less bandwidth. This allows optimal use of available storage space and bandwidth. At night, the Ranger Dual 5+5MP activates infrared-based night vision, with everything clearly visible in black-and-white tones.

Advanced AI detection

The Ranger Dual 5+5MP features highly accurate and smart detection thanks to Imou Sense. IMOU SENSE™ is a self-developed AI algorithm under the Imou brand. Among other things, this algorithm enables it to accurately detect people, vehicles, pets and parcels. Thanks to its powerful computational base, the response time of IMOU SENSE™ to detect is just 0.02 seconds; faster than blinking once to detect and then immediately send a notification.

Baby monitor & pets

Besides securing the home, the camera is perfect for use as a baby monitor or to watch pets. With the Ranger Dual 5+5MP, you always have an eye on things and are immediately notified in case of an event. It is possible to receive a notification as soon as movement or a strange sound is detected. Respond to an event immediately by listening and reacting via the built-in speaker and microphone. There is also a clear picture in the dark thanks to Full Color night vision technology. In short, a great baby monitor or camera for pets.

Installation

Download the Imou Life app (iOS, Android or Windows) and create an Imou account. After logging in, select the ""+"" sign at the top right of the Imou app to add a camera. Scan the QR code on the camera and follow the steps in the app. The camera has a built-in 2.4GHz WiFi chip. In addition, the camera also has an Ethernet port for wired connection. Next, select the Wi-Fi network and make sure the camera is close to the router during installation. The camera will be ready to use in no time. For recording images, you can choose the Imou Cloud service, as well as local storage using a MicroSD card or an Imou NVR.
