R5,529

With our control elements, you have everything under control

With the Touch Select control you can regulate the desired cooking zone easily. Simply select the power level you need.

Speed up your cooking.

When you want to get quick and easy meals on the table even faster, PowerBoost can help. This practical feature adds a boost of power for ultra-quick heating. Use it on your induction hob to boil large quantities of water – and heat almost 35% faster compared to the highest power level.

Cookings starts much faster.

The QuickStart function detects where you have placed the pot and automatically displays the

corresponding cooking zone on the control interface. You can get started straight away and select the desired cooking level for your pot without delay.

Stores your control settings.

Have you ever unintendedly switched off your hob and all settings were gone? With Restart the cooktop saves your previous settings and restores them in case you switch your cooktop on again within four seconds.

The handy ChildLock locks the control panel.

The handy ChildLock locks the control panel to prevent accidental changes in settings.

Faster cooking, reduced energy consumption. This is Induction.

Induction hobs generate heat only where it is needed – in the base of the pan. What does this mean for you? More safety and more convenience. The lower temperature keeps both big and little hands safe from burning. Not only that, but an induction hob brings two litres of water to a boil twice as fast as a glass-ceramic hob, which also saves a great deal of energy.
