

Ecovacs DFI030035 vacuum accessory/supply Filter Robot vacuum

Model: DFI030035

Manufacturer: ECOVACS

EAN: 6970135033553

Product Code: 841959

R912

This filter has been specifically designed for DEEBOT N20 PRO PLUS & DEEBOT N20e PLUS' Auto-Empty Station which is the first station that adopts PureCyclone™ Technology.

This technology effectively solves the problem of the station encountering suction loss over time, all while providing a stable and efficient dust collection experience.

This double layer cotton filter is designed to prevent particles as small as 0.3 microns from being expelled into the air when the station is auto-emptying.

The filter has also been tested to ensure that the Auto Empty Station retains its 26,000Pa suction power level when dust collecting for six months at a time.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
