Wi-Fi Auto-Sync for Unified Wi-Fi Network

Wi-Fi Auto-Sync creates a simple, intuitive powerline experience. Pressing the Wi-Fi Clone button instantly copies your network name and password from your router for easy setup. Wi-Fi Move automatically applies any settings changes across the network. Your existing Wi-Fi settings will be synchronized to the new extender automatically.

Extend Your Powerline Network to Any Room

Based on the Powerline technology, your network extension is never limited to the primary coverage of your router. With advanced HomePlug AV2, TL-WPA4221 KIT is perfect for providing stable, high-speed data transfer rates of up to 600 Mbps on a line length of up to 300 meters, bring network to anywhere there is a power outlet.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Plug and Play!

Plug the TL-PA4010 in the wall and connect it to the router with an Ethernet cable. Then plug the TL-WPA4220 in any desired power outlet. There you go! Just enjoy the seamless, high speed wired and wireless network.

Press the “Pair” buttons on both adapters to create a more secure network.

Powerline Management on Your Smartphone

The tpPLC Utility and tpPLC app make it easy to control wireless network settings, set schedules for Wi-Fi availability and even control the LED indicators on your adapters from any iOS or Android device. You can download the tpPLC app for iOS and Android devices. You can download the intuitive new tpPLC Utility for your PC at www.tp-link.com/en.
