CAT6 Flat cables are perfect for installations where you need to save space in IT Racks and Cabinets. They are also very ideal to be laid behind baseboards to be laid under carpets or other floors. All the cables are tested up to 250Mhz (CAT6 standard) and are backwards compatible with CAT5e and CAT5 cables. Each cable is manufactured with a snaggle which prevents the connector from being damaged when you install the cable through an installation with very less space.
