CAT6 slim cables are perfect for installations where you need to save space in IT Racks and Cabinets. These cables are thinner and very flexible, which provides the installer with better accessibility and quick and easy switching. Furthermore, it improves the Air-Flow, thereby reducing the risk of downtime. These cables are tested up to 250MHz (CAT6 standard) and are backwards compatible with CAT5e and CAT5 cables. Each cable is manufactured with a snaggle that prevents the connector from being damaged when you install the cable through an installation with very little space.
