Ultimea Poseidon D60 Soundbar

The Ultimea Poseidon D60 is an advanced soundbar that delivers immersive, spacious sound thanks to six powerful drivers, two satellite speakers, and a wireless subwoofer. Precise sound positioning, clear and detailed sound generated by a digital amplifier, and low noise levels guarantee complete immersion in movies, TV series, and music. The whole thing is complemented by smart app control with extensive EQ settings, Bluetooth connectivity, wide compatibility with 4K TVs, and convenient remote control with shortcut buttons, creating a complete and refined home theater system.

three-dimensional sound that surrounds you from all sides. The spatial effect is clearer and more precise than with standard Dolby Digital, giving dialog, effects, and music realistic positioning in space.

Powerful, deep bass

Low frequencies are handled by a wireless subwoofer supported by BassMX™ technology, which provides deeper, more dynamic, and more expressive bass. An optimized magnetic circuit, larger enclosure, and impressive 15-millimeter diaphragm stroke translate into fuller, more resonant low-frequency sound. Every bass beat is felt, and the whole remains controlled and clear.

Full immersion in sound

The set consists of 6 high-performance drivers, two satellite speakers, and a subwoofer, which allows for a consistent and immersive surround sound effect. An additional advantage is the independent volume control of the satellite speakers, which allows you to precisely adjust the sound balance to the size of the room and your preferences.

Clear sound without interference

At the heart of the system is the Ti TASS80SM digital amplifier, which is responsible for the richness of detail and clarity of sound. The noise level is kept below 36 dB, allowing you to enjoy undisturbed listening, both during dynamic movie sessions and when listening to music in peace.

Smart control

Thanks to a dedicated mobile app, your smartphone can act as a smart remote control. You have 6 equalizer modes, a 10-band equalizer, and 121 presets at your disposal, allowing you to fine-tune the sound to the type of content and your individual preferences. The included remote control offers one-touch shortcuts for quick access to the most important functions. Controlling your entertainment becomes intuitive and instantaneous – exactly when you need it.

Bluetooth connectivity and compatibility

Built-in Bluetooth 5.3 technology ensures a stable wireless connection and smooth audio transmission. It's a convenient solution for listening to music without cables, while maintaining high audio quality. The soundbar works seamlessly with many devices, including 4K Smart TVs. It supports AUX, optical, and HDMI eARC connections, providing configuration flexibility and high-quality audio transmission in a variety of usage scenarios.
