Ultimea Apollo S70 Ultra Soundbar

The Ultimea Apollo S70 Ultra is a sophisticated 7.1 soundbar that combines spatial sound with impressive lighting effects and a flexible modular design. Based on SurroundX™ technology and eight drivers, the system delivers immersive, multi-directional audio, complemented by a wired subwoofer and rear surround speakers. Dynamic lighting effects with adjustable modes and brightness create an atmosphere tailored to your movie, music, or game. The mobile app allows for convenient control and quick sound adjustment thanks to extensive EQ settings. Bluetooth 5.3 connectivity, HDMI eARC support, and a wide range of connectors ensure compatibility with a variety of sources.

Cinema sound that surprises

The Ultimea Apollo S70 Ultra is an advanced 7.1 soundbar with a modular, detachable design, created for those who want to experience true sound space in their living room. Based on

SurroundX™ technology and eight powerful drivers, the system creates a wide, multidimensional soundstage that surrounds the listener from the front, sides, and rear. Dialogue becomes clearer, special effects become more dynamic, and music sounds fuller and more natural.

Powerful bass that fills any room

The centerpiece of the system is a 6.5-inch wired subwoofer that enriches every viewing experience with deep bass. The low tones perfectly complement the soundtracks of movies and games, and move to the beat of the music thanks to built-in LED effects. Each bass beat heightens the emotion, creating the effect of a real home theater experience.

Rear speakers with mood lighting

Two rear surround speakers expand the soundstage and make the sound literally surround the listener from all sides. Integrated ambient lighting further enhances the atmosphere, creating a consistent atmosphere with the image on the screen. This solution is ideal for evening movie viewing, gaming, or listening to music.

Lighting to suit your mood

The Apollo S70 Ultra offers extensive lighting options that can be freely adjusted to suit your interior design and current mood. There are six dynamic scene modes and millions of colors to choose from, as well as the ability to smoothly adjust the brightness. The lighting effects can subtly fill the space or become a striking element of the design, responding to the rhythm of the music and the pace of the action.

Full sound customization with the app

The advanced Utimea mobile app turns your smartphone into a smart remote control and control center for the entire system. It allows you to choose from six EQ modes, precisely adjust the ten-band equalizer, and access up to 121 presets that let you perfectly match the sound to movies, music, games, or sports. This level of control will be appreciated by both demanding audiophiles and users looking for simple, ready-made settings.

Modular design that adapts to your space

The three-piece, detachable soundbar design gives you complete freedom of installation and setup. The Apollo S70 Ultra can be used as a compact soundbar on your desk, a classic wall-mounted set in a left, center, and right configuration, or as a full-size wall system. This allows it to easily adapt to different layouts and rooms while maintaining a consistent look and high sound quality.

Stable connectivity and full compatibility

The soundbar uses Bluetooth 5.3 technology, providing a stable wireless connection at a distance of up to 15 meters in various conditions. HDMI eARC support guarantees fast and high-quality audio transmission, and the CEC function allows for convenient synchronization with your TV. A rich set of connectors, including DC IN, FR, FL, SUB OUT, AUX, OPTICAL, USB, and HDMI TO TV (eARC), allows you to easily connect all your audio sources.

The perfect choice for larger rooms

The Ultimea Apollo S70 Ultra is designed for rooms of approximately 35-46 m², where a wired configuration allows you to fully exploit the potential of a 7.1 system. It is an option for those who expect powerful and detailed sound, as well as impressive visuals and modern design that enhances the experience of every viewing.
