Ultimea Apollo S90 Soundbar

The Ultimea Apollo S90 is a 9.1 soundbar that combines Dolby Atmos surround sound, a detachable modular design, and impressive RGB lighting in one cohesive home theater system. Rear speakers and a dedicated subwoofer provide complete immersion in sound, while SurroundX™ technology ensures realistic sound from every angle. The system offers extensive customization options, from hundreds of EQ and equalizer presets in the app to adjustable lighting modes to suit your mood and content. Seamless Bluetooth 5.3 connectivity, HDMI eARC and CEC support, and flexible mounting options make the Apollo S90 easy to fit into any interior and usage style, offering a complete, impressive audio-visual experience.

True Dolby Atmos immersion

Dolby Atmos technology is responsible for the realistic reproduction of sound movement in three-dimensional space. Every whisper, explosion, or musical accent is precisely located around you, transporting you right into the middle of the action. The proprietary SurroundX™ technology is

responsible for the full sound environment, delivering immersive sound from every direction.

Rear surround speakers and 9.1 channels

The 9.1 configuration with two rear surround speakers significantly widens the soundstage, providing cinematic depth and channel separation. This makes dialogue clear, effects dynamic, and music fill the entire room. Detachable modules allow you to customize the layout of the set to suit your space—you can place the equipment on your desk or mount it on the wall.

Clearly perceptible bass

The system is complemented by a 6.5-inch wired subwoofer that gives low frequencies the right weight and elasticity. Every beat, punch, and soundtrack gains deep, physically perceptible bass. The effect is enhanced by synchronized lighting, giving the sound visual power as well.

An atmosphere to suit the moment

The Apollo S90 offers an extensive dynamic RGB lighting system with brightness control and millions of colors. Special modes—such as Halloween, Party, Rhythm, Christmas, Movie, and Cycle—allow you to instantly create the right mood, while illuminated surround speakers create a spectacular atmosphere throughout the room.

Sound personalization

The smart app gives you full control over the sound. The 10-band equalizer allows for precise tuning, and 121 preset EQs let you tailor the sound to movies, music, games, or your own preferences. This freedom of personalization translates into perfect sound in every situation.

Smooth connectivity and ease of use

The soundbar uses Bluetooth 5.3 technology, providing a stable wireless connection with a range of up to 15 meters in various scenarios. HDMI support ensures fast, stable, and high-quality signal transmission, while the CEC function allows for convenient device synchronization and control with a single remote. There are also numerous ports available, including HDMI eARC for TV, HDMI IN,

optical, AUX, USB, and dedicated FR and FL inputs.

Flexible installation and interior design

The Apollo S90 can be placed on a desk, mounted on a wall, or used in an L/C/R configuration, allowing it to fit perfectly into any interior. The modular design makes it easy to arrange the space, and the modernist styling emphasizes the character of your home entertainment center. Ultimea Apollo S90 combines powerful sound, smart features, and spectacular lighting.
