Ultimea Skywave F40 BOOM Soundbar

The Ultimea Skywave F40 BOOM is an advanced soundbar that delivers Dolby Atmos cinematic surround sound with a clear height effect thanks to upward-facing speakers and rear surround speakers. The system offers 460 W of power and enhanced bass with BassMX technology, resulting in dynamic and deep sound throughout the room. Xupmix intelligent processing allows you to achieve a multi-channel sound effect even from classic sources, and app control with an equalizer and EQ presets allows you to quickly adjust the sound to your preferences. HDMI eARC, Bluetooth 5.4, and CEC support ensure a stable connection, perfect synchronization with the image, and convenient remote control operation.

Sound that fills the entire space

With Dolby Atmos technology and the proprietary SurroundX system, sound surrounds you from all sides—not just from the front and rear, but also from above. The 5.1.2 system is designed for—

maximum immersion in sound. Two upward-facing speakers reflect sound waves off the ceiling, creating a distinct height effect and a three-dimensional soundstage. Two rear surround speakers ensure authentic surround sound, while the center stage remains clear and dynamic, so dialogue is always clear, even in the most intense scenes.

Power you can hear and feel

The soundbar offers an impressive peak power of 460 W, which easily fills rooms of 20-25 m². The use of a larger subwoofer compared to previous generations allows for even deeper, more noticeable bass. BassMX technology amplifies low frequencies, giving explosions, music, and special effects the right power and cinematic feel.

One-touch sound processing

Xupmix technology, supported by Dolby DAP, instantly transforms standard stereo sound into rich, multi-channel surround sound. With just one touch, even content without native Dolby Atmos gains the space, depth, and dynamics that were previously reserved exclusively for cinema productions.

Sound tailored to your preferences

Ultimea Skywave F40 BOOM offers full control over the sound thanks to a smart mobile app. You have a 10-band equalizer and 121 preset equalizer matrices at your disposal, allowing you to precisely adjust the sound character to the type of content, room, and your own preferences. Controlling the settings is quick, intuitive, and always at your fingertips.

Stable connectivity and compatibility

The soundbar supports HDMI eARC, ensuring fast, stable, and high-quality audio transmission without delays. Bluetooth 5.4 guarantees even faster pairing, greater connection stability, and ultra-low latency, so the sound is perfectly synchronized with the image. In addition, the CEC function allows you to control the soundbar and TV with a remote control—from turning it on, to adjusting the volume, to changing the signal source.

Thoughtful construction and elegant design
