Ultimea Skywave X50 Soundbar

The Ultimea Skywave X50 is an advanced 5.1.4 soundbar system with Dolby Atmos, designed for users who want a realistic home theater experience without having to build a classic receiver + speaker setup. The 5.1.4 configuration, a total of 10 drivers, and a large 8" subwoofer deliver full-fledged surround sound that encompasses not only the space around the listener, but also the area above them. The system is designed to deliver clear dialogue, dynamic special effects, and deep bass for movies, gaming, and music.

Spatial sound that truly surrounds you

The 5.1.4 channel layout allows for precise sound placement throughout the room. Sound is not limited to a single plane – effects can come from the sides, rear, and above, significantly increasing the sense of realism. The soundstage is wide, well-balanced, and consistent, so both fast-paced action scenes and quieter dialogue moments sound natural and engaging.

Dolby Atmos and multidimensional soundstage

Dolby Atmos support allows for object-based audio playback, in which individual elements of the audio track are precisely positioned in space. In practice, this means a more realistic representation of the movement, height, and distance of sounds—from flying objects to subtle background effects. The Skywave X50 can convey the vision of filmmakers and game developers without the need for additional ceiling speakers.

Powerful NEURACORE audio processing

Advanced audio processing is handled by the NEURACORE platform, based on a multi-core DSP processor and MCU with a total power of 2000 MIPS. This system enables precise channel control, dynamic sound mapping, and stable performance even with complex audio tracks. As a result, the Skywave X50 maintains clarity, good channel separation, and sound consistency regardless of the type of content.

GaN amplifier - stability and high efficiency

The GaN-based amplifier used ensures high energy efficiency and stable operation under heavy load. Compared to traditional silicon solutions, it generates less heat and maintains high sound quality even at high volumes. This translates into cleaner sound, less distortion, and longer component life.

8" subwoofer with powerful, controlled bass

The centerpiece of the low frequencies is a subwoofer equipped with an 8-inch driver. It is responsible for deep, palpable bass that enhances the dynamics of action movies, special effects, and music tracks. The bass remains crisp and controlled—without unpleasant rumbling—complementing the other sound frequencies.

Rear surround speakers—precision and depth

The system uses two rear speakers to realistically fill the rear of the soundstage. Their design allows for better reproduction of sound movement in space and increases the feeling of immersion in the action. This is an important element of the set for movies and games that use multi-channel sound.

Stable connectivity and Bluetooth 5.4

The Skywave X50 offers a wide range of connectivity options, including Bluetooth 5.4, which ensures stable transmission and fast pairing with mobile devices. The system works seamlessly with TVs, consoles, media players, and smartphones, allowing you to conveniently play music and audio content without the use of cables.

Full compatibility

HDMI eARC port, optical input, and USB port allow for easy integration with modern and older devices. HDMI eARC support allows you to stream high-quality audio directly from your TV, while the other inputs increase the flexibility of the entire system in everyday use.

Convenient operation and sound customization

The included remote control provides quick access to all the most important functions, including sound modes and the X-Upmix function, which allows you to expand standard stereo material into surround sound. In addition, the Ultimea app gives you access to a 10-band equalizer and 121 preset sound profiles, so you can precisely tailor the sound to your preferences and the type of content you are watching.

Included

- Soundbar
- Subwoofer
- Surround speaker x2
- Soundbar power supply
- Surround speaker power supplies x2
- Subwoofer power adapter
- HDMI cable
- Digital optical cable
- Remote control
- Mounting brackets x6
- Mounting screws x12
