PXN W AS Gaming Steering Wheel

The PXN W AS gaming steering wheel, with a 280 mm diameter, is designed for precise control and maximum realism while driving. The ergonomic shape of the rim ensures a secure grip, and the programmable buttons allow you to customize the controls to your preferences. Its compatibility with VD4/VD6 bases and support for PCs make it easy to integrate the device into your setup. This is the solution for those who demand full control and quick response in every situation on the track!

Precise control and realistic feel

The aluminum alloy paddle shifters utilize Hall Effect technology, resulting in accurate and repeatable operation without delays. The magnetic-linear system provides distinct, tactile feedback with every gear change, improving vehicle control during the most critical moments of the race. What's more, the four paddles expand control options, offering greater flexibility while driving.

Quick replacement and robust construction

The steering wheel is equipped with an aluminum alloy quick-release system that allows for instant rim replacement without tools. This is a practical solution for those using different hardware configurations. Additionally, the robust construction and Slip Ring communication ensure stable and uninterrupted operation—even during intense gameplay.

Full control customization

The PXN W AS model offers 12 buttons, 2 rotary encoders, and an extensive control panel. This makes it very easy and convenient to use. What’s more, the programmable buttons let you assign key functions exactly where you need them—from adjusting vehicle settings to quick access to essential commands. This solution lets you focus on driving without taking your hands off the wheel.

Comfort and a Secure Grip

The rim is covered in fully braided microfiber leather, which is pleasant to the touch and guarantees a secure grip even during long sessions. This gives you greater control over the vehicle! The ergonomic design further improves comfort and reduces hand fatigue.
