CAT6 slim cables are perfect for installations where you need to save space in IT Racks and Cabinets. These cables are thinner and very flexible which provides the installer a better accessibility and quick and easy switching. Furthermore, it improves the Air-Flow, and thereby reducing the risk of downtime. These cables are tested up to 250MHz (CAT6 standard) and are backwards compatible with CAT5e and CAT5 cables. Each cable is manufactured with a snaggle which prevents the connector from being damaged when you install the cable through an installation with very little space.
