

GIGABYTE GP- UD1600PM PG5 1600W AI TOP 80+ Gold PSU

Model: GP-UD1600PM PG5

Manufacturer: GIGABYTE

EAN: 4719331555047

Product Code: 870260

R7,744

The GIGABYTE UD1600PM PG5 AI power supply is designed to deliver robust performance and reliability for demanding systems. With a power output of 1600 W, it ensures that every component receives sufficient power, optimizing system performance. Featuring 80 PLUS Platinum efficiency, it provides energy savings, allowing for cooler operation and reduced electricity costs. The fully modular design facilitates easy cable management, enabling a cleaner and more organized build. Enhanced by a 140 mm dual ball bearing cooling fan and Zero RPM fan mode, it effectively maintains optimal temperatures while minimizing noise levels.

Safety is a priority with the included protections such as overheat, overcurrent, overvoltage, overpower, undervoltage, and short-circuit protection. The power supply complies with various standards including TUV, FCC, RoHS, and more, ensuring quality and environmental safety. Designed for versatility, it offers multiple connection types, making it compatible with a wide range of components, and modular cables provide an efficient setup tailored to specific needs.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
