R958

Effective protection for USB-C ports: Reliably prevents dust and dirt from entering unused USB-C ports.

Ideal for professional AV and digital signage systems: Suitable for displays, media players and devices in public or industrial areas.

Use without tools for quick protection: The caps can be easily attached to USB-C plugs and removed without leaving any residue.

Rugged plastic for long-term use: Durable material for long-term use in indoor and outdoor applications.

Large pack for efficient service use: 50-pack ideal for technicians, maintenance teams or system houses with high demand.

The InLine® dust protection set for USB-C plugs offers professional protection for sensitive device connections. Open USB-C ports are particularly susceptible to dust, dirt and moisture - especially in public environments or when ports are not permanently occupied. The black protective caps made of

robust plastic are manufactured to fit USB-C plugs perfectly and can be fitted quickly and without tools.

The dust protection caps extend the service life of connections by preventing corrosion, contact problems and potential short circuits. They are ideal for digital signage displays, LED video walls, AV systems and control devices in airports, train stations, stadiums or conference centers. They also make a valuable contribution to operational safety in maintenance areas, IT installations and service organizations.

Thanks to the practical 50-piece bulk pack, even extensive installations can be protected quickly and uniformly. The unobtrusive black color scheme ensures a professional appearance.

Application: For USB-C plugs

Material: plastic

Color: black

Packaging unit: 50 pieces

Tool-free application
