EMEET SmartCam S600 Kit Webcam

The EMEET SmartCam S600 Kit is a webcam offering native 4K UHD resolution at 30 FPS and smooth 1080p at 60 FPS, resulting in exceptional image sharpness and natural motion during live streams. Support for multiple resolutions—from 720p to 4K—lets you adjust the quality to your current needs, while fast and precise autofocus ensures your face always stays in focus. This solution works well for video conferencing, streaming, and content creation.

Sharp image in every situation

The Fast & Accurate Focus feature ensures quick and precise focusing, allowing the camera to react instantly to changes and maintain a clear image of your face. In practice, this means better detail and a more professional appearance during online meetings or recordings. The ability to choose different resolutions further increases flexibility—whether you prioritize maximum quality or smoothness.

Clear, interference-free sound

The camera is equipped with built-in microphones featuring noise reduction, which effectively minimize ambient noise and focus on your voice. The full potential of Clear Voice technology is activated through the EMEETLINK software, which offers an advanced noise-canceling mode. This ensures that callers hear you clearly even in less-than-ideal acoustic conditions.

Full privacy control and convenient setup

The EMEET SmartCam S600 Kit features a physical, rotating lens cover that you can use to cover the lens when the camera is not in use. This simple solution enhances your sense of security and control over your privacy. The gimbal-style mounting system allows the camera to rotate 360°, making it easy to frame the perfect shot. Additionally, the standard 1/4-inch thread ensures compatibility with tripods and other accessories.

Simple operation and broad compatibility

The camera operates in Plug & Play mode—simply connect it via USB to start using it immediately without installing drivers. For more demanding users, the EMEETLINK app is available, allowing full customization of image settings such as white balance, exposure, digital zoom, and field of view (FOV) adjustment ranging from 65° to 88°.

Ready to use on any platform

The EMEET SmartCam S600 Kit is compatible with Windows (XP/Vista/7/8/10/11), macOS, and Linux, offering great flexibility. The camera supports popular communication and streaming platforms such as Skype, Zoom, Microsoft Teams, Google Meet, YouTube, and OBS.
