EMEET SmartCam C60E 4K Dual Webcam

The EMEET SmartCam C60E 4K Dual is a webcam equipped with two lenses—a wide-angle and a telephoto lens—that let you easily change your framing without having to reposition the device. It offers 4K video at 30 fps and 1080p at 60 fps, fast PDAF autofocus, and 11x hybrid zoom. Thanks to the USB-C port, the included USB-A adapter, and plug-and-play functionality, it's ready to use immediately after connection, making it easy to use for online meetings, recordings, and live streams alike.

Greater control over the image and details

The use of two lenses provides greater flexibility in various scenarios. The wide-angle lens is ideal for capturing full-body shots or larger spaces, while the telephoto lens enables precise close-ups.

Combined with 11x hybrid zoom, this allows you to show details of products, documents, or work elements without having to change the camera settings. Autofocus works quickly and maintains focus on the selected subject, reducing the need for manual adjustments and letting you focus on delivering your presentation.

Smooth recording and compatibility with various formats

4K resolution ensures a clear, detailed image, while 1080p at 60 fps enhances smoothness, which is important for dynamic shots. The camera can operate in both landscape and portrait orientations, making it easy to prepare content for various platforms. Additionally, the ability to point it at a desk allows you to conveniently present notes, sketches, or products, which works well for sales broadcasts and instructional materials.

Convenient operation and desk integration

Built-in RGB lighting in three colors lets you adapt the look of your footage to your surroundings and give it a more cohesive feel. The included remote control allows you to switch lenses and adjust settings remotely, making it easier to work without interrupting your recording. The long cable provides greater freedom to position the camera on your desk, making it easier to adjust its position to fit your workspace.

Better communication and broad compatibility

Two built-in noise-canceling microphones improve voice quality and reduce ambient noise, resulting in clearer conversations and recordings. The camera works with EMEET STUDIO software, which allows you to customize image settings to your needs. It supports Windows and macOS and works with popular platforms such as Zoom, Microsoft Teams, Google Meet, OBS, YouTube, and Twitch, making it ideal for both work and content creation.

Included

- webcam
- USB-C to USB-A adapter
- privacy cover
