EMEET SmartCam S600 Webcam

The EMEET SmartCam S600 is a webcam designed for people who expect professional-grade quality, whether they're streaming live, creating content, or participating in video conferences. It captures video in Ultra HD 4K resolution with an 8-megapixel sensor, while also offering smooth 1080p at 60 frames per second. Intelligent autofocus and automatic light correction ensure a perfect appearance in any conditions, and two noise-canceling microphones guarantee clear, natural sound. The package is rounded out by broad compatibility, intuitive plug-and-play operation, and practical features that enhance comfort and privacy. This is equipment that lets you focus on what matters most.

With attention to every detail

An advanced sensor is responsible for the exceptional image quality, capturing video in 4K resolution with a precision of up to 8 million pixels. That's four times more detail than standard webcams,

resulting in a clearer, more realistic, and professional visual experience. Natural color reproduction makes the image look authentic and clear, whether you're participating in business meetings or streaming a live broadcast.

Intelligent image adjustment for every situation

The camera is equipped with advanced autofocus that automatically maintains focus without the need for manual adjustment. You can move freely in front of the camera or present objects without worrying about losing image quality. This technology is complemented by intelligent lighting correction, which adjusts image settings in both low and bright light. No matter the conditions, you always look clear and professional.

A field of view focused on you

The 73° field of view was selected to maintain the perfect balance between the width of the shot and the focus on the person speaking in front of the camera. The device does not include unnecessary background, yet allows you to comfortably present your full figure or workspace. This solution will be particularly appreciated by content creators, online meeting hosts, and remote workers.

Clear, interference-free sound

Two built-in microphones with noise-canceling technology effectively eliminate ambient noise, focusing exclusively on your voice. This ensures clear and natural communication, allowing your listeners to hear exactly what you want to convey. This solution works well for business calls, recordings, and live streams alike.

Privacy and full control over the image

The built-in, rotating privacy cover allows you to easily cover the lens when the camera is not in use. The knob-based mechanism enables quick and convenient privacy protection without having to disconnect the device. Additionally, the EMEETLINK software lets you customize image settings and updates, so you can tailor the camera's performance to your preferences.

Flexible Mounting

Plug-and-play support means the camera is ready to use immediately after connection—no drivers or complicated setup required. The camera’s design prioritizes maximum versatility. A flexible 180° clip allows you to securely mount it on a monitor, and the ability to rotate the base horizontally by 45° facilitates precise framing. Alternatively, you can place the camera flat or mount it on a tripod, adjusting the setup to your workspace or recording needs. Wide compatibility covers the most popular operating systems and platforms such as OBS, XSplit, YouTube, and Twitch. This is equipment that works with you and your needs.

Included

- webcam
- 1.5m USB-C cable
- user manual

Manufacturer	EMEET
Model	S600
