EMEET SmartCam S800 Webcam

In the world of video conferencing and streaming, every detail counts—from image quality to sound clarity. The EMEET SmartCam S800 combines exceptional 4K quality, advanced AI features, and high-performance noise-canceling microphones to create a comprehensive tool for work, streaming, and communication. Thanks to a large Sony sensor, HDR support, and 10-bit color depth, the image impresses with its realism in all lighting conditions. Instant autofocus and adjustable framing allow you to tailor the shot to any situation. The package is rounded out by broad compatibility and intuitive software that gives you full control over the device.

4K UHD video with HDR and a realistic color palette

The camera offers 4K resolution at 30 fps and 1080p at 60 fps, resulting in exceptional detail and smoothness. HDR technology combined with 10-bit color depth captures a much wider range of brightness and colors, making the image more natural and realistic. Over 1.07 billion colors give

every scene depth, and details are clear in both bright and dark areas of the frame. HDR works by combining multiple exposures, resulting in an effect similar to what the human eye sees.

Excellent quality in all conditions

The use of a large 1/2" Sony sensor combined with a bright F/1.8 aperture significantly improves image quality. The camera performs excellently in both bright and low-light conditions, maintaining sharpness and natural color reproduction. Recording at 60 fps in Full HD guarantees an exceptionally smooth image, ideal for both video calls and dynamic gaming streams. Thanks to fast, lossless USB 3.0 transmission, the image is transmitted without delays or loss of quality—a critical factor in professional applications.

Smart Focus

An advanced AI-powered PDAF and TOF system ensures extremely fast and precise focusing. Autofocus reacts in just 0.3 seconds, instantly adapting to changes in the frame. The AI Face Autofocus feature automatically detects faces and keeps them perfectly in focus, which is particularly useful during meetings, presentations, or live streams. Additionally, the dedicated EMEETLINK software allows for convenient management of camera settings, adjustment of image parameters, and software updates. This gives you full control over the device's operation and allows you to tailor it to specific scenarios.

Clear, interference-free sound

Dual microphones with advanced noise reduction effectively eliminate ambient noise, focusing on your voice. Upgraded noise-reduction technology allows you to hold conversations comfortably even in less-than-ideal environments, without the need for additional microphones. An additional advantage of the camera is its built-in, rotating lens cover, which makes it easy to ensure privacy when you're not using the device.

Flexible framing

The ability to adjust the field of view from 40° to 73° lets you tailor the frame to your individual needs—from close-up shots of your face to wider shots covering more space. The camera also allows

you to easily adjust the angle to show your desk surface or materials during a presentation, making it an ideal tool for remote work and learning. What’s more, the EMEET SmartCam S800 can be used in many ways. You can place it flat or mount it on a monitor, a desk stand, or a floor stand. This flexibility ensures the camera adapts to any workspace, regardless of its setup.

Manufacturer	EMEET
Model	S800
Maximum resolution	4K Ultra HD 2160p at 30 frames per second
Maximum frame rate	Full HD 1080p at 60 frames per second
Resolution	8 megapixels
Sensor	Large 1/2" Sony sensor
Focus type	AI-powered face autofocus / center-area autofocus / PDAF+TOF
Digital zoom	4x
Field of view (FoV)	40° ~ 73°
Video recording range	10–300 cm
HDR	Yes
Exposure mode	Auto
White balance	Auto
BLC (backlight compensation)	Auto
Video codec	YUY2 / MJPEG
Microphone	2 omnidirectional microphones

Optimal reception range	3 m
Privacy cover	Gear-driven cover
Tripod thread	Yes
Dimensions (W × H × D)	71.5 mm × 52 mm × 71 mm
Weight	180 g ± 10 g
Compatibility	Compatible with major operating systems and popular software, including OBS, Xsplit, YouTube, Twitch, Zoom, etc.
Operating system	Windows 7, 8, 10, 11 or later, Mac OS 10.10 or later

Gross weight: 340, Net weight: 180, Box length: 12,50, Box width: 10,50, Box height: 7,50, GPSR
