Model: ST100

Manufacturer: NEEWER

EAN: 6921268812508

Product Code: 873760

R2,672

NEEWER ST100 camera mount

The NEEWER ST100 is a sturdy overhead mount ideal for flat lay photography, food videos, drawing, unboxing, and creating tutorials. Made of durable steel, the kit supports up to 4.5 kg, providing stable support for a camera or smartphone. The design, featuring a crossbar and the ability to expand with additional accessories, allows you to create a professional recording setup in your home studio.

Flexible setup and expansion

The mount is equipped with a 1/4" thread, allowing for stable mounting of a downward-facing camera and precise height adjustment. The crossbar features 12 mounting points, allowing you to freely position additional accessories such as lighting or magic arms (secured with M6 screws). Additionally, two L-shaped brackets allow for mounting a backdrop, making it easier to set up an aesthetically pleasing scene for your recordings.

Height adjustment and stable construction

Each side column offers 14 levels of height adjustment ranging from 61.5 to 100 cm, allowing you to adapt the setup to various recording scenarios. A system of spring-loaded pins and screws ensures quick and convenient adjustment. A stable T-shaped base helps maintain the balance of the entire structure, while non-slip elements protect the desk surface and enhance safety during use.

Thoughtful details and ease of use

The design is engineered for easy assembly—simply connect the crossbar to the columns to get started. Non-slip bases and edge guards protect both your equipment and surfaces from damage. The ability to place the mount on a desk at least 100 cm wide or directly on the floor increases its versatility, allowing you to adapt the workstation to your available space.
