AOCHUAN X3 Gimbal with AI Sensor (Black)

The AOCHUAN X3 Gimbal with AI Sensor is a compact yet highly advanced tool for creators who want to achieve cinematic-quality shots effortlessly. Equipped with 3-axis stabilization, intelligent 360° face tracking, an AI module with adjustable lighting, a 51 cm extendable pole, and a Bluetooth remote control—it gives you complete creative freedom in any conditions. Add to that as many as 6 recording modes, gesture controls, and a lightweight, foldable design—and you have a device that makes a difference from the very first shot.

Perfectly smooth, shake-free footage

Advanced 3-axis stabilization eliminates shakes and vibrations, even during dynamic movements. This ensures your footage looks professional—whether you're vlogging on the go, recording a travel vlog, or creating content for social media. Stability that was once only available to filmmakers—now fits in your pocket.

Intelligent 360° Face Tracking and Gesture Control

The built-in AI module automatically tracks your face across a full 360° range, keeping you in the center of the frame at all times. You don't need to ask anyone for help—a simple hand gesture is all it takes to start or stop recording. It's the perfect solution for solo creators, live streamers, and anyone who values convenience and independence.

Always perfect lighting—wherever you are

The magnetic AI module features a fill light with smooth 0–100% brightness adjustment. Regardless of lighting conditions, your recordings will look crisp and professional. No more dark, grainy shots—now you have control over the lighting in any situation.

More perspective thanks to the built-in 51 cm extension pole

The integrated, extendable selfie stick, measuring up to 510 mm in length, allows you to capture a wider frame and more of the background. Perfect for group photos, vlogs, and shots from a greater distance. Additionally, the built-in selfie mirror makes it easy to frame your shot precisely—you'll always get it just right. The gimbal supports smartphones with a width of 55–85 mm and a weight capacity of up to 330 g—meaning most available models.

Full remote control - create without limits

The magnetic Bluetooth remote lets you control the gimbal from up to 10 meters away. Start recording, change settings, and control shots without touching the device. What's more, the remote lasts up to 12 hours on a single charge—perfect for long sessions and outdoor shoots.

Recording modes tailored to every situation

The AOCHUAN X3 offers as many as 6 operating modes (PF, F, POV, DM, GO, S) that adapt the gimbal's behavior to your recording style. Want dynamic action shots? Or perhaps smooth panoramas? You choose the mode—the device does the rest. Plus, precise zoom and focus control give you even greater creative freedom.

Compact, lightweight, and ready for any trip

It weighs just about 410 g and takes up minimal space when folded (111.9 × 44.3 × 175 mm). You can easily fit it in a backpack or purse. At the same time, its sturdy construction and wide operating temperature range (-10°C to 55°C) mean you can rely on it in any conditions. The dual Li-ion battery (800 mAh ×2) provides up to 7.5 hours of standby time, and a full charge takes only about 2 hours. That means more recording and less waiting.

Included in the set:

- AOCHUAN X3 gimbal
- AI module with built-in fill light
- Storage case
- USB-C charging cable
- Gimbal user manual
- AI module with light user manual
