AOCHUAN M3 Pro mini Gimbal with AI Sensor (Black)

Meet the AOCHUAN M3 Pro mini—a smart, compact 4-in-1 gimbal that combines the functions of a selfie stick, stabilizer, tripod, and AI gimbal with face-tracking capabilities. Equipped with an app-free AI module, a Bluetooth remote control, 7-color RGB lighting, and an extendable pole up to 66 cm long—it gives you complete creative freedom in any situation. Lightweight, portable, and ready to go in seconds—it's the perfect choice for anyone who wants to record comfortably and impressively.

Record without an app - smart face tracking and gestures

Forget about installing additional software. The built-in AI sensor automatically recognizes and tracks your face in real time—just turn on the device. What's more, you can control recording with gestures, giving you complete freedom to work without touching your phone.

4 functions in one device - maximum possibilities

The AOCHUAN M3 Pro mini is a true mobile recording hub. It functions as a selfie stick, stabilizer, tripod, and AI gimbal. This means you don't need multiple devices—you have everything in one compact solution. Perfect for vlogs, live streams, group photos, or everyday use.

Creative RGB lighting - make your recordings stand out

An additional RGB lighting module with 7 colors lets you give your content a unique vibe. You can match the light color to the mood, the style of your recording, or simply stand out from other creators. It's an easy way to achieve a more professional and eye-catching effect.

Bluetooth Remote - Full Control from a Distance

The kit includes a Bluetooth remote that lets you control the device from up to 10 meters away. Take photos, record, and control shots without having to approach the gimbal. The remote lasts up to 30 days on a single charge, making it an extremely practical solution.

More in the frame - extension up to 66 cm

The integrated selfie stick allows you to extend the gimbal to a height of up to 66 cm (with the phone), giving you much greater freedom to frame your shots. You'll capture more background, more people, and more details—without needing additional accessories.

Lightweight, compact, and always at hand

Despite its vast capabilities, the device weighs only 335 g and has very compact dimensions when folded. You can easily fit it in a bag or backpack. It's the perfect choice for travel, spontaneous recordings, and everyday use.

Stability and power for the whole day

The built-in stabilization motor effectively reduces vibrations, ensuring smooth shots in handheld mode. The 1000 mAh battery provides approximately 7 hours of runtime (or about 4 hours in AI tracking mode), and a full charge takes about 3 hours. Ready when you're ready.
