AOCHUAN X Gimbal (Gray)

The AOCHUAN X gimbal is a compact yet highly advanced tool for anyone who wants to create smooth, professional-quality footage with a smartphone. Equipped with 3-axis image stabilization, intelligent face tracking, gesture control, and built-in lighting, it lets you shoot like a pro—no matter the conditions. Add to that a removable battery, up to 6 recording modes, and precise zoom and focus control. This is equipment that gives you full control over every shot.

3-axis stabilization - no more shakes

The advanced 3-axis stabilization system eliminates shakes and vibrations even during dynamic shots. Whether you're recording on the move, walking, or capturing sports footage—the image remains smooth and professional. It's a quality that instantly sets your footage apart.

6 recording modes—create without limits

The AOCHUAN X offers six shooting modes: PF, F, L, POV, DM, and S. Each mode provides different framing and camera movement options—from classic shots and dynamic transitions to complete freedom in POV mode. This lets you tailor your recording style to your vision and create exactly what you want.

Built-in lighting - always perfect conditions

The integrated, 3-section fill light ensures your recordings look great even in low light. You don't need to invest in additional accessories—everything you need is already in one device. It's convenient and saves time in every situation.

Replaceable battery - record without limits

Thanks to the magnetic cover and replaceable 18650 battery, you can forget about limitations. All you need is a spare battery to get back to work immediately. The standard 2550 mAh battery provides up to 7–9 hours of runtime, and charging takes only about 2.5 hours.

Precise control - zoom and focus at your fingertips

Built-in zoom and focus controls give you full control over the shot without touching your phone's screen. This feature, familiar from professional cameras, is now available in a compact gimbal—perfect for vloggers, creators, and video enthusiasts.

Smart tracking and gesture control

The gimbal automatically recognizes your face and follows it, keeping you in the center of the frame. You can also control recording with simple gestures—without touching the device. This is incredibly convenient, especially when you're recording alone.

Compact, lightweight, and always ready

It weighs just 295 g and fits in the palm of your hand, so you can take it anywhere. When folded, it takes up minimal space while offering the full functionality of professional equipment. The perfect companion for travel, vlogging, and everyday content creation.
