

Flytec V803-GPS 5200mAh bait boat

Model: V803-GPS 5200mah

Manufacturer: FLYTEC

EAN: 5905156102125

Product Code: 875172

R4,385

Flytec V803-GPS 5200mAh bait boat

The Flytec V803-GPS is an advanced bait boat with precise GPS and Beidou navigation, fishing ground and fishing point recording, and automatic return to the starting point. It offers stable gyroscope control, cruise mode, and swimming between programmed points. Four independent bait chambers allow for precise baiting, and a dual antenna provides a stable signal and a range of up to 500 m. Dual power supply, two speed modes, navigation lighting, distance data transmission, rig sending function, and the possibility of expanding with an echo sounder are complemented by a clear remote control with a color screen and backlit buttons.

Intelligent control and stable course

The V803-GPS offers a full range of maneuvers—forward and reverse, left and right turns—allowing you to move freely in a variety of water conditions. The built-in precision gyroscope automatically corrects course deviations, eliminating boat drift and ensuring stable, predictable navigation even in

windy or wavy conditions. The combination of GPS and Beidou navigation provides exceptional steering accuracy, full control over the route, and stress-free use even on larger bodies of water.

Cruise mode

The cruise control function allows you to sail in a straight line at a constant speed without your constant intervention. In addition, the boat can automatically navigate between saved anchor points, which significantly increases baiting efficiency and saves time and energy during longer fishing sessions. The device allows you to save up to 4 fishing grounds and as many as 200 fishing points, so you can return to exactly the same, proven locations without having to steer manually.

Four independent bait chambers

The Flytec V803-GPS is equipped with four separately controlled bait chambers. This solution allows for precise bait dispensing in different locations and adjustment of baiting to current conditions and fishing strategies.

Long range, reliable connectivity

The dual gain antenna ensures stable signal transmission, high resistance to interference, and an impressive control range of up to 500 meters. This allows the boat to remain fully functional even on large bodies of water. The system continuously transmits information about the distance traveled, allowing for accurate measurement of distance on the water. In addition, the boat supports hook attachment and line casting, allowing you to precisely place your rig at the desired point and increase your fishing efficiency.

Safe use

The use of two power cables allows you to work with two batteries at the same time, ensuring uninterrupted operation and longer sailing time. The system informs you when the energy level is low, preventing unexpected discharge while working on the water. The boat is also equipped with bright navigation lights at the bow and rear lights indicating the direction of turn. You can choose between continuous or flashing light modes, which facilitates orientation and increases safety during night fishing.

Automatic return in any situation

The Flytec V803-GPS will return to its starting point on its own with a single push of a button, as well as automatically in the event of a weak signal, low battery, loss of control, or exceeding the maximum range. This solution protects your equipment and gives you complete peace of mind during use.

Powerful motors and additional features

The dual drive with large propellers and tangle-resistant design ensures high performance and smooth operation. You can switch between slow and fast modes at any time to adjust the speed to your current needs. Control is via a remote control with a large color screen and backlit buttons, ensuring convenient operation even after dark. The boat's design also allows for the addition of an echo sounder, so you can detect fish in real time and plan your fishing trips even more effectively in the future.

Included in the set

- boat
- boat battery
- antenna x2
- remote control
- USB cable
- Type C remote control charging cable
- carrying rope
- spare propeller screws x2
- user manual

Manufacturer	Flytec
Model	V803 GPS
Color	black

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. Material	ABS plastic and electronic parts
Control range	500 m
Speed	250 m/min
Motor	dual 390 motor
Controller battery	3.7 V 2000 mAh
Boat battery	7.4 V 5200 mAh
Charging time	6 hours
Control time	2 hours
Load capacity	3000 g
GPS points	4 fishing grounds / 200 fishing points
Product dimensions (L x W x H)	55 x 26.8 x 20 cm
Weight	2279 g

Gross weight: 3230, Net weight: 2279, Box length: 57,50, Box width: 33,00, Box height: 26,00, GPSR
