

Mileseey TP2 Plus Wi-Fi Thermal Imaging Camera

Model: TP2 Plus

Manufacturer: MILESEEEY

EAN: 6971915322980

Product Code: 875176

R7,529

Mileseey TP2 Plus Wi-Fi Thermal Imaging Camera

The Mileseey TP2 Plus Wi-Fi thermal imaging camera allows you to capture thermal images in various modes, giving you full control over how you interpret the data. With wireless connectivity and a dedicated app, it turns your smartphone into a professional diagnostic tool that's always at your fingertips. Advanced image processing algorithms and analytical features ensure that every scan provides precise information. This solution is designed for those who expect more—both at work and in everyday use.

Four imaging modes - full control over what you see

Operational flexibility is one of this model's greatest strengths. The camera offers as many as four imaging modes, such as classic thermal imaging, visible light view, a fusion mode combining both

images, and Picture-in-Picture (PIP), which allows you to simultaneously analyze details and the surrounding context. Such a wide range of options allows you to tailor the display to a specific situation. This gives you both a clear image and a more complete understanding of the object being analyzed.

Wireless convenience and mobility without compromise

The compact, handheld design and Wi-Fi connectivity make the device ideal for field work. The camera connects wirelessly to your smartphone, eliminating the need for cables and additional equipment. Simply connect it to your phone to start working immediately. Mobility and ease of use go hand in hand with professional capabilities, making it the ideal tool for both specialists and home use.

Your smartphone as a thermal analysis hub

The dedicated Smart Life app, available on Google Play and the App Store, opens up entirely new possibilities for working with thermal images. Once connected, the camera transforms your phone into a comprehensive analysis hub, offering intuitive access to all features. The interface is designed to simplify operation as much as possible while providing access to professional analysis tools.

Advanced analysis

The Milesee TP2 Plus Wi-Fi is not limited to simply displaying temperatures. Thanks to advanced analysis features, you can use multi-zone temperature measurement, allowing you to monitor different areas of the image simultaneously. Additionally, the device enables offline analysis and the generation of detailed reports in PDF format, which significantly streamlines documentation and work in a professional environment. It is a solution that supports data-driven decision-making.

Exceptional image quality thanks to MATRIX IV technology

At the heart of the device is the advanced MATRIX IV algorithm, which is responsible for processing and enhancing thermal image quality. Thanks to it, the resulting image is clearer, more detailed, and easier to interpret. This technology allows you to detect subtle temperature differences that might go unnoticed in standard solutions, taking the precision of your work to a whole new level.

A tool that adapts to your needs

The combination of mobility, advanced analysis, and high-quality imaging makes the Mileseey TP2 Plus Wi-Fi camera suitable for a wide range of scenarios—from system diagnostics and technical inspections to everyday practical applications. It is a versatile solution that combines intuitive operation with professional capabilities, giving you full control over every aspect of your thermal imaging work.
