MERACH Rowing Machine

The MERACH MR-R15B1-EU rowing machine is a modern piece of exercise equipment designed for home cardio workouts and full-body strength training. The magnetic resistance system ensures smooth and quiet movement, allowing you to train at any time of day without disturbing other household members. The model offers 16 levels of electronic resistance adjustment controlled directly from the handle, allowing you to conveniently change the intensity of your workout without interrupting your training. A stable construction with a maximum weight capacity of 158 kg, an extended rail for taller users, an LCD display, and space-saving storage options make this device ideal for regular home workouts.

Smooth operation and comfortable workouts

The magnetic resistance system ensures smooth movement and high comfort of use regardless of workout intensity. A lightweight 3 kg flywheel combined with a modern magnetic system guarantees

smooth movement without unnecessary strain on the structure. As a result, the machine operates stably and quietly, which is particularly important during evening workouts or when used in an apartment. The smooth motion also promotes a more natural exercise experience and makes it easier to maintain proper form during longer training sessions.

Electronic resistance adjustment without interrupting your workout

The MERACH MR-R15B1-EU model features 16 resistance levels that can be adjusted in real time using the buttons on the handlebar. This allows you to quickly increase or decrease the intensity of your workout without having to stop. In practice, this means greater convenience and the ability to smoothly transition between a gentle cardio workout and more demanding intervals. The wide range of adjustment also makes the equipment suitable for both beginners and more advanced users.

Design suited to various body types

The rowing machine is equipped with an extended 130 cm rail, which provides a greater range of motion and comfort even for taller users. The stable construction allows people weighing up to 158 kg to exercise safely, increasing the machine’s versatility. The dimensions of the equipment when unfolded are 187.2 × 46.8 × 75.4 cm, allowing the user to maintain a comfortable position during training. The unit weighs 21 kg, which helps maintain stability during more intense workouts while also making it easier to set up the equipment in the desired location.

LCD Display and Space-Saving Storage

The easy-to-read LCD display allows for convenient monitoring of workout parameters and helps track progress during daily exercises. The adjustable phone or tablet holder keeps your workout app, music, or video within reach, enhancing comfort during longer sessions. The design also prioritizes convenient storage—the ability to fold or position the machine vertically helps save space after your workout. As a result, the rowing machine works well in apartments and smaller spaces.
