MERACH MR-R15B2-EU Rowing Machine

The MERACH MR-R15B2-EU rowing machine is a model with a magnetic resistance system that allows you to train comfortably at home regardless of your fitness level. The machine offers 16 levels of precise resistance adjustment, so you can easily tailor the intensity of your workout to your abilities and the type of training. The extended 130 cm rail provides a greater range of motion and more comfortable use, even for taller users. The model is also equipped with a display, a bottle holder, and a design that allows for easier storage after your workout.

Smooth magnetic resistance system

The magnetic resistance system ensures smooth and quieter operation, allowing you to train without excessive noise. With 16 levels of adjustment, you can gradually increase the intensity of your workout and better control your pace. This range of settings makes the machine suitable for both gentler cardio workouts and more demanding full-body sessions. The smooth motion during rowing

improves exercise comfort and allows you to maintain a natural training rhythm.

Extended rail for greater freedom of movement

The 130 cm rail is designed to provide a more comfortable and natural motion during your workout. The greater range of motion allows for greater muscle engagement and improves exercise comfort for taller users. The manufacturer has also incorporated improved handles and an optimal rail angle, which helps reduce the risk of elbows coming into contact with the legs during more intense rowing. This ensures smoother and more ergonomic movement.

Functionality tailored to home use

The MERACH MR-R15B2-EU is equipped with a practical display that allows you to monitor key workout metrics. The built-in water bottle holder keeps water within easy reach, enhancing comfort during longer workouts. Despite its lightweight 20 kg design, the machine boasts an impressive weight capacity of up to 158 kg, a testament to the durability of the materials used. An additional advantage is the space-saving design, which allows for more convenient storage.

Quick assembly and ready to go

The rowing machine comes largely pre-assembled, so it takes about 20 minutes to get it ready for your first workout. This is a practical solution for those who want to start exercising quickly without the hassle of complicated assembly. The intuitive design makes assembly and daily use of the machine easy. As a result, the MERACH MR-R15B2-EU model is well-suited as equipment for a home workout area for those looking for convenient gear for regular exercise.
