Product Code: 875377

R3,067

ANLAN 02-AGSY51-ORA 3-in-1 Body, Face, and Head Massager

The ANLAN 02-AGSY51-ORA is an advanced 3-in-1 massager that combines dual-frequency EMS microcurrents, light therapy, and heating and cooling functions, providing comprehensive care for the face, scalp, and body. The device offers 3 microcurrent intensity levels and a temperature range from 18°C to 46°C, allowing you to precisely tailor the treatment to your skin's needs. Thanks to its interchangeable tips and wide range of applications, it is ideal for both daily skincare and relaxing massage.

EMS Microcurrents for Skin Firming and Stimulation

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Dual-frequency microcurrent technology works on both the skin's surface and its deeper layers. Lower frequencies stimulate hair follicles and superficial muscles, supporting the condition of the scalp and face. Higher frequencies penetrate deeper, improving skin firmness and elasticity. Thanks to intelligent frequency adjustment, the device ensures comfortable use without an unpleasant tingling sensation.

Heating and cooling functions for better skincare results

The massager offers two temperature modes that support different stages of skincare. The heating mode, ranging from 38°C to 46°C, helps relax the skin, supports the absorption of skincare products, and reduces wrinkles. The cooling mode, on the other hand, operates within a range of 18°C-26°C and takes effect in just 3 seconds, helping to tighten pores, reduce puffiness, and soothe sensitive skin. This combination allows for comprehensive care of the skin's appearance and condition.

Light Therapy for Regeneration and Cleansing

The device uses two types of light to address different skin needs. Red light with a wavelength of 630-660 nm stimulates collagen regeneration and supports repair processes. Violet light in the 380-420 nm range has antibacterial and anti-inflammatory effects, helping to control sebum production and limit bacterial growth. Depending on the selected tip, the therapy can be tailored to specific areas.

Interchangeable tips suited for various applications

The modular design includes several attachments that expand the device's functionality. The metal massage attachment with a curved surface conforms well to the contours of the face and body and works in conjunction with the heating and cooling functions. The wide comb allows for a deep massage of the scalp, back, or shoulders, mimicking pressure techniques. A precision comb with narrow teeth is ideal for caring for delicate areas and acupressure points. Additionally, the attachment with massage balls provides a multi-point massage that helps relieve muscle tension.

Thoughtful design and safety

The ergonomic, curved design makes it easy to adapt the device to different parts of the body, increasing comfort during use. Intelligent microcurrent frequency control minimizes discomfort during treatments, and the combination of light therapy and EMS allows for better skincare results. It is worth noting that the red light operates independently and is not used simultaneously with EMS in certain modes.

Included in the set

- ANLAN 02-AGSY51-0RA massager
- Mountain metal massage tip
- Wide-tooth comb tip
- Narrow-tooth comb tip
- 7D massage ball attachment
- Velour case
- User manual
- USB-C charging cable

Manufacturer	Anlan
Model	02-AGSY51-0RA
Battery capacity	1200 mAh
Input	5V / 1A
Operating time	Mountain Massage Head (cooling mode): approx. 90 minutes; other modes: approx. 180 minutes
Charging time	approx. 120 minutes
Material	ABS + PC + zinc alloy + stainless steel
Rated power	5 W
