Revolutionary multifunctional station with Vortex Wash, first-ever automatic Wiping Pad wash for completely hands-free cleaning

WINBOT W3 OMNI introduces a revolutionary station featuring Vortex Wash— the industry's first-ever contact-free Wiping Pad wash. In just 1 minute, keeping Wiping Pads fresh without any hand-washing. The station provides on-demand self-cleaning to maintain its own cleanliness. For ultimate flexibility, WINBOT W3 OMNI operates plugged-in or on battery, with a two-in-one power & safety cable and anti-dropping protection for secure, worry-free cleaning. Let the robot handle the work—simply press one button to start and enjoy truly hands-free cleaning.

Vortex Wash, Industry's First Contact-free Wiping Pad Washing

No more hand-washing or touching dirty wiping pad! With Vortex Wash, the WINBOT W3 OMNI cleans and maintains Wiping Pads for you, thoroughly cleaning them in just 1 minute. Inside the station, sixteen high-pressure nozzles unleash 20kPa jet sprays to break down deep stains, while four scrubbing discs spin at 200 RPM to clean every fiber up to 900 times per minute. Finally, a precision scraper removes dirty water and leaves just the right amount of moisture for streak-free results. The

entire process is quick and effortless—leaving your Wiping Pads refreshed and ready every time.

Station Self-Cleaning, Consistently Fresh, Always Ready

After each cleaning cycle, you can choose whether to activate the station's self-cleaning, keeping it fresh and well-maintained. When needed, the system delivers a deep scrub, with each disc's rear scraper sweeping chamber walls spotless. All dirty water and debris are collected in a sealed grime tray, while a dedicated pipeline continuously drains it into the wastewater tank. The result is a cleaner, fresher station interior—automatically maintained, without extra effort.

Dual Power Modes, Unlimited Flexibility

WINBOT W3 OMNI supports both plug-in and battery-powered operation, giving you the freedom to clean anywhere—even where no outlet is available. The built-in battery delivers up to 130 minutes of continuous cleaning on a single charge, making it easy to tackle various of cleaning scenarios from indoor windows to an exterior glass surface.

Two-in-one Compound Cable with Both Safety and Power Cords

The composite safety rope and power cord combines both cables into one, connecting everything into one tidy unit which eliminates tangled cables and wires. The station is equipped with an automatic cable management function to wind cables and simplifies the storage process.

Anti-Dropping Protection Mechanism

The station, weighing 10 kg itself, generates over 800N of suction force to prevent the WINBOT W3 OMNI from falling under any extreme circumstances. The primary safety rope is a three-layer composite cable with a tensile strength of up to 100 kg. For added protection, an additional 1-meter safety rope is attached to the base of the station.

Triple innovations for a deeper clean: WIN-SLAM 5.0, TruEdge, and Three-Nozzle Wide-Angle Spray Technology

Powered by the upgraded WIN-SLAM 5.0 algorithm, WINBOT W3 OMNI adapts intelligently to diverse cleaning scenarios with unmatched precision and versatility, meeting every cleaning need with ease. TruEdge technology reaches edges and corners with 1.1 mm accuracy, while the enhanced Three-Nozzle Wide-Angle Spray Technology tackles stubborn stains in a single sweep. Together, these innovations deliver a smarter, deeper, worry-free clean - so every window shines effortlessly.

TruEdge Technology: Edge-to-Edge Cleaning Without Cross-Contamination

With an innovative TruEdge Scrubber, When WINBOT approaches the edges, it actively lowers the TruEdge Scrubber at up to 200 RPM for powerful, deep cleaning of heavy dirt. Stubborn grime is removed in a single swipe, and after cleaning, the scrubber retracts automatically to prevent cross-recontamination.

WIN-SLAM 5.0, Intelligent Navigation for Every Scenario

Powered by the upgraded WIN-SLAM 5.0 algorithm and multi-sensor smart detection, WINBOT W3 OMNI achieves dynamic obstacle avoidance with 1 mm precision. With multiple modes at your fingertips, you can easily choose the one that fits your needs: Edge Clean for corners, Fast Clean for quick touch-ups, Heavy-Duty Clean for tougher areas, Spot Clean for stubborn stains, plus Deep Clean, Thorough Clean, and Zone Clean for total flexibility. Enhanced to a speed of 16 cm/s, WINBOT W3 OMNI delivers industry-leading performance that redefines window cleaning.

Three-Nozzle Wide-angle Spray Technology with Wet Wiping Pad for Window Cleaning

The Three-Nozzle Wide-Angle Spray Technology works with the wet mop to ensure efficient and effective cleaning. With high water pressure and broad time coverage, all dirt dissolves and is wiped clean in one single stroke.

Intuitive Interaction, Instant Control

WINBOT W3 OMNI elevates interaction by blending screen-based control, transparent front panel, and seamless connectivity. Whether through the ECOVACS HOME APP or direct Bluetooth/Wi-Fi connection, every command is at your fingertips—simple, instant, and reassuring.

Pioneering Aesthetics, Pleasure in Every Touch

Blending classic color blocks with timeless geometric shapes, the station delivers a sleek, minimalist design that stands out with modern elegance. It features a transparent circular front panel that reveals the inner cleaning mechanism, turning technology into a visual experience. As brushes spin and water flows, you see every wash in action—offering both modern style and the reassurance of a truly thorough clean. The station's top panel combines tactile buttons with a clear visual display, so you always know which mode is active and when cleaning is complete. Simple screen prompts remove the guesswork, making every interaction effortless and reassuring - where cutting-edge technology meets the warmth of human-centered design.

ECOVACS HOME APP, Total Control

Introducing all-new omnidirectional control via the ECOVACS HOME App. Forget moving in just four directions—now enjoy seamless 360° movement at your fingertips. Manage every cleaning task anytime, anywhere, making window care effortless. The intuitive App is also pre-set with 8 cleaning modes to fit every need: Fast Clean, Deep Clean, Thorough Clean, Spot Clean, Edge Clean, Remote Control, Heavy-duty Clean and Zone Clean.

12-Stage Protection for Added Peace-of-Mind

With the 12-stage protection system from both hardware and software support, WINBOT W3 OMNI offers the highest level of window cleaning safety along with cleanliness.

8-Hardware-based Fall Protection Measures

8 hardware-based fall protection features, ranging from Auto air pressure compensation, optimized 10000Pa suction power, floating cleaning cloth plate and design. Even if the power level is low, the WINBOT W3 OMNI will remain attached to the window for over 30 minutes. With multiple Anti-drop protection mechanisms and features, this is the safest and firmest robotic window cleaner you will own.

3-Stage Intelligent Protection

The WINBOT W3 OMNI is equipped with 2 types of sensors - a gravity acceleration sensor to keep the machine stable at all times, and optocoupler sensor to detect edges with a superfast 0.02 second response time, ensuring cleaning safety at all time. What's more, WINBOT can navigate around low obstacles and easily escape.

Accidental Damage Insurance

For even further assurance, WINBOT W3 OMNI users can also enjoy insurance protection in the unlikely event of damage caused by a loss of suction.

Multi-language Notification, Voice Prompt - ensure You Always Stay in Control

Voice notification in more than 11 languages, allowing users to always stay in control of the robot status. The elderly and children can also easily control the WINBOT W3 OMNI - making cleaning more intuitive and easier.
