Magcubic L018 Projector

The Magcubic L018 is a versatile portable projector that offers native 1080p resolution, 400 ANSI lumens of brightness, 8K signal support, and Android 14. Thanks to automatic focus adjustment and keystone correction, as well as Wi-Fi 6 and Bluetooth 5.2 connectivity, the device allows you to conveniently display images in various conditions and locations. You also have three operating modes at your disposal: Standard, Highlight, and Energy Saving. Its compact design and wide range of setup options make the L018 model ideal for both home use and travel.

Clear Full HD image and 8K support

The projector offers a native resolution of 1080p, which translates to good sharpness and detail clarity when watching movies or playing games. Support for 8K content allows you to enjoy modern video sources without limitations. Add to that a 1500:1 contrast ratio, which ensures the image remains sharp and details are clearly visible in both bright and darker scenes.

Android 14 - enjoy your favorite apps

The built-in Android 14 system lets you conveniently use your favorite apps and streaming platforms. This allows you to watch your favorite content directly from the projector, using an intuitive interface and convenient navigation. The package also includes a compact remote control that makes operating the device easy.

Automatic image adjustment and convenient operation

The projector is equipped with features that eliminate the need for manual configuration. Auto Focus automatically adjusts the focus, and automatic keystone correction ensures the correct aspect ratio. Also worth noting are the obstacle avoidance and image adjustment options. All of this means you can start watching in the blink of an eye—you don't have to set everything up yourself.

Project Anywhere

The Magcubic L018 stands out for its adjustable projection angle, allowing you to display the image not only on a wall but also, for example, on the ceiling. Thanks to its compact and lightweight design, the device can be easily moved and set up anywhere—on a table, a shelf, or outdoors. This solution offers great flexibility and lets you tailor your viewing experience to your preferences.

Various connectivity options

The projector supports Wi-Fi 6 (2.4 GHz + 5 GHz) and Bluetooth 5.2, ensuring a stable and fast connection. Support for technologies such as Miracast, AirPlay, and DLNA expands compatibility and allows for easy content streaming from a smartphone, tablet, or laptop. You can also connect selected devices via cables—USB-A, HDMI, and a 3.5 mm audio jack are available.

Powerful processor and smooth performance

The projector uses the Allwinner H726 processor with a quad-core ARM Cortex-A53 architecture and Mali-G31 graphics. Combined with 1 GB of RAM and 8 GB of ROM, it ensures stable system operation and smooth app performance. This makes using the device comfortable and hassle-free.

Built-in stereo speaker and enhanced audio experience

The L018 model is equipped with a Hi-Fi stereo speaker, allowing you to use the device without additional sound equipment. This is a convenient solution when watching movies, playing games, or using the projector in various locations. If needed, you can also connect the device to an external audio system via Bluetooth.

An image tailored to you

The projector offers a maximum screen size of 200 inches and delivers a large image even from a short distance. This makes it perfect for smaller rooms! The L018 also features a 50-100% zoom range, allowing you to adjust the projection size without having to reposition the projector. Additionally, various picture modes are available, such as Standard, Highlight, and Energy Saving, allowing you to tailor the device’s performance to current conditions and user preferences.

Included

- Projector
- Remote control
- Power cable
- User manual
