

EJEAS V4 Plus motorcycle intercom for up to 4 participants

Model: V4-Plus

Manufacturer: EJEAS

EAN: 5905156101937

Product Code: 875563

R1,727

EJEAS V4 Plus motorcycle intercom for up to 4 participants

Group motorcycle trips are much more enjoyable when communication between participants is instant, clear, and smooth. The EJEAS V4 Plus intercom combines a stable Bluetooth 5.1 connection, CVC noise reduction, and Hi-Fi speakers, so conversations remain clear even at higher speeds. Support for phone calls, music, navigation, and FM radio makes the device a companion for the rider in every situation on the road. Long battery life and IP65 resistance allow you to use it without worry in various weather conditions. The whole thing is complemented by compatibility with most helmets and a mobile app that makes it easy to configure groups and manage functions.

Connectivity and range that won't let you down

Traveling in a group requires smooth communication, which is why the EJEAS V4 Plus allows up to four users to connect simultaneously. The improved Qualcomm Bluetooth 5.1 chip is responsible for stable data transmission and fast device pairing, which translates into natural conversations without interference. In open terrain, the intercom has a range of up to 1,500 meters between four units, allowing you to stay in touch even when there are larger distances between riders. This solution facilitates ride coordination, obstacle warnings, and spontaneous information exchange on the road.

Clear sound while riding

Conversations in a helmet are subject to wind noise and ambient noise, so the use of CVC noise reduction technology is critical to communication quality. The system intelligently recognizes background sounds and adjusts the filtration level, reducing echo and road noise. Combined with Hi-Fi speakers, this provides spacious, three-dimensional sound and clear voice transmission, making messages understandable even during dynamic riding. Sound stability remains high during intercom conversations as well as when listening to music or navigation messages.

Phone, music, radio, and voice assistant in one

When paired with a smartphone, the intercom acts as a wireless headset, allowing you to answer calls, listen to music, and hear GPS messages without taking your hands off the handlebars. Support for two phones at the same time increases flexibility of use, and automatic call answering allows you to stay focused on the road. The built-in FM radio with a range of 76-108 MHz gives you access to broadcasts while driving, and voice assistant support allows you to quickly control functions. The connection range with your smartphone is up to 10 meters, allowing you to maintain stability even when your phone is hidden.

Long battery life and resistance to road conditions

The 750 mAh battery provides up to 18 hours of intercom calls and up to 24 hours of music playback, which in practice means you are ready for multi-day trips. Standby mode of up to 260 hours minimizes the need for frequent charging, and a full recharge takes about 3 hours. The IP65-rated housing protects the device from rain and dust, provided that the headset connector is properly connected. This ensures that the intercom remains functional in the changing weather conditions typical of motorcycle riding.

Wide compatibility and convenient operation on the road

The intercom is designed to fit most full-face, open-face, and half-face helmets, and installation is quick and easy. The device also works with the EJEAS EUC handlebar remote control, allowing you to safely control functions without taking your hands off the handlebars. In addition, the EJEAS app for iOS and Android allows you to create intercom groups, configure settings, and manage connections, reducing the time needed to prepare for the ride. This solution makes motorcycle communication simpler, more intuitive, and always ready to go.

Manufacturer	EJEAS
Model	V4 Plus
Wireless connectivity	Bluetooth 5.1 (Qualcomm chip)
Intercom range	up to 1500 m in open terrain (between 4 devices)
Number of intercom users	up to 4 people simultaneously
Phone connection range	up to 10 m
Phone support	simultaneous connection to 2 phones
Automatic call answering	yes
Noise reduction	CVC technology (intelligent noise and echo reduction)
Speakers	Hi-Fi, 3D sound
FM radio	76-108 MHz
Battery capacity	750 mAh
Talk time	up to 18 hours
Music playback time	up to 24 hours
Standby time	up to 260 hours
Charging time	approx. 3 hours
Resistance	IP65

Control

Compatible with EUC remote control (external steering wheel controller)

Mobile app

EJEAS App (iOS, Android)
