R5,272

NEEWER GR18C Round LED Panel for Side Lighting

The Neewer GR18C is an advanced lighting panel designed for professional use in photography and video studios. Thanks to its side-lighting technology and full RGB color palette, the device offers a wide range of possibilities for creating atmosphere and visual effects. The panel's circular shape promotes even light diffusion, which is crucial for portraits and product shoots. It is a tool that allows for precise adjustment of lighting parameters to the individual needs of each project.

The Versatility of RGB Lighting

RGB lighting technology provides full control over the color of the emitted light, allowing you to create a wide range of moods and visual scenarios. You can choose from millions of colors, which is invaluable for creating unique effects. This feature allows you to quickly adapt the lighting to the

project's aesthetic, whether it's a dynamic music video or a serene product shoot. As a result, light becomes an integral part of the visual narrative, enhancing its depth and appeal.

Innovative side lighting

The side-lit design influences the light beam characteristics, offering soft and diffused light. This solution minimizes the formation of harsh shadows, which is particularly desirable in portraits and interviews. This technology makes the light more pleasing to the eye and renders object details more naturally. For the creator, this means less post-production work and higher image quality right from the shooting stage.

Circular Shape for Even Diffusion

The circular shape of the Neewer GR18C light panel is key to achieving natural and even scene illumination. The absence of sharp edges in the light source results in softer tonal transitions and subtle reflections in the eyes of the subjects. This geometry perfectly mimics natural light sources or the effects achieved with softboxes. It is a solution that enhances aesthetics and professionalism in any video or photography project.

Potential in Video and Photography Production

The Neewer GR18C was designed with a variety of production scenarios in mind, from studio shoots to outdoor sessions. Its lighting capabilities excel at creating dynamic shots where changing the color of the light can emphasize emotions or the dynamics of the action. It is a tool that allows you to experiment with color and intensity, opening up new perspectives for your creativity. This product supports both experienced professionals and novice creators, giving them full control over the visual aspect of their work.

A Tool for Content Creators

The Neewer GR18C is designed with the needs of modern content creators, vloggers, and streamers in mind. Stable and effective lighting is the foundation for creating high-quality visual content, which translates to audience engagement. The device allows you to achieve a professional look in your recordings without the need for complicated setups. This lets you focus on your message, confident
