

Neewer TP74 Professional Video Tripod with Fluid Head

Model: TP74

Manufacturer: NEEWER

EAN: 6976831830892

Product Code: 876930

R3,902

Neewer TP74 Professional Video Tripod with Fluid Head

The Neewer TP74 is a professional video tripod with a fluid head, designed for filmmakers, content creators, and camera operators who demand stability and smooth movements during recording. The sturdy aluminum alloy construction ensures high durability and a load capacity of up to 8 kg, allowing the tripod to easily support DSLR cameras, mirrorless cameras, video cameras, and additional accessories. Height adjustment from 86 to 187 cm allows you to comfortably adapt the setup to various shooting scenarios, while the fluid head with 360° rotation and a tilt range from -70° to +90° makes it easy to create smooth pans and dynamic shots.

Stable construction for field and studio work

The tripod's construction is made of durable aluminum alloy, ensuring stability during filming and resistance to heavy use. The double tandem legs effectively reduce vibrations and improve the rigidity of the entire setup, ensuring stable footage even with heavier equipment. The center brace further stiffens the structure and helps maintain proper leg spacing when working on uneven ground. Rubber non-slip feet improve traction, which increases equipment safety both during outdoor and indoor shoots.

Fluid head for smooth camera movements

The fluid head is equipped with a damping system that enables smooth panning and controlled transitions between shots. The 360° rotation is ideal for capturing wide panoramic shots, and the head's tilt range of -70° to +90° provides greater flexibility when working with different filming perspectives. The built-in spirit level helps you quickly set the correct frame level, reducing the need for later shot corrections. The telescopic handle can be mounted on the left or right side of the head, making the tripod comfortable to use for both right- and left-handed people.

Height Adjustment and Convenient Transport

The three-section legs with flip-lock clamps allow you to quickly adjust the tripod's height to your current needs. The adjustment range from 86 to 187 cm makes it easy to capture both low-angle shots and shots from a higher perspective. When folded, the tripod measures 91 cm in length, making it easier to store and transport between locations. The included carrying bag facilitates safe transport of the equipment and protects it during travel. The ability to adjust the clamp tension using Allen wrenches allows you to further customize the locking mechanism to your preferences. The tripod is equipped with 1/4" and 3/8" mounting threads, making it compatible with many cameras, camcorders, and accessories used in video production. You can easily attach equipment from brands such as Sony, Canon, or Nikon, as well as professional film cameras.

Included

- Neewer TP74 aluminum tripod
- Fluid head with quick-release plate
- L-shaped Allen wrenches x 3
- Carrying bag
