

Mileseey DT20 Laser Distance Measurer with a 40-meter measuring tape

Model: DT 20

Manufacturer: MILESEY

EAN: 6971915320207

Product Code: 877575

R1,715

Mileseey DT20 Laser Distance Meter with 40m Measuring Tape

The Mileseey DT20 Laser Distance Meter combines the functionality of a classic measuring tape with modern laser technology, offering a measurement range of up to 40 m and real-time digital readings. Thanks to the backlit LCD screen, automatic calculation functions, and measurement memory, you can work faster and without errors. Its compact design, shock resistance, and ability to operate in various conditions make this tool ideal for both home and construction site use. It's the solution for those who expect maximum accuracy and convenience in a single device.

Two tools in one

The Mileseey DT20 is a versatile device that combines a laser rangefinder with a range of 0.2 to 40 meters with a classic 5-meter measuring tape. This combination allows you to adapt the measurement method to a specific situation—the laser is ideal for longer distances, while the tape ensures precision for shorter distances and details. What's more, both modes can work together, enabling quick and accurate calculation of area and volume, even when using data from the tape.

Instant readings and full data control

The Data Sync Display technology ensures that every measurement is automatically displayed on the screen in real time without the need to record or memorize results. Simply extend the tape to immediately see the exact value on the display. Importantly, the device retains full functionality regardless of the order of operations; even if the tape is extended before powering on, the result will be correctly read and displayed upon startup.

Precision You Can Trust

Advanced optical decoding technology and an error correction system ensure exceptional measurement accuracy. A Class II laser (1 mW) guarantees safe and stable operation, achieving precision up to $\pm 1/8$ inch, while the digital tape measure offers accuracy up to $\pm 1/16$ inch. A dual-sided scale with metric and imperial units further enhances the tool's versatility, allowing you to work with different standards without having to convert values.

Smart features that speed up your work

The DT20 is equipped with a range of features that streamline daily measurements. The backlit LCD screen ensures readability in all conditions, and the ability to change units allows you to customize the device to your individual preferences—simply hold the “UNIT” button for one second to change the measurement reference point (pre or post datum). Automatic area and volume calculations eliminate the need for manual counting, and the memory for up to 20 results allows you to conveniently refer back to previous data without taking notes.

Designed to work in all conditions

The compact and lightweight design ensures the rangefinder fits perfectly in your hand and doesn't feel heavy during extended use. Thanks to its thoughtful ergonomics and the use of shock-absorbing materials, the device is resistant to drops and heavy use. Additional features, such as a wrist strap or rear clip, allow for comfortable use of the device even at heights, e.g., on scaffolding, ladders, or lifts.

Versatile application

The Mileseey DT20 is ideal for both simple household tasks and demanding professional applications. It is the perfect tool for interior designers, construction crews, carpenters, and industrial measurement specialists. Whether you're measuring an apartment, a production hall, or a warehouse, you can count on fast, accurate, and convenient results, without unnecessary complications or the risk of errors.

Manufacturer	Mileseey
Model	DT20
Dimensions	8 × 3.28 cm
Weight	35 g
Tape width	1.8 cm
Tape length	Approx. 5 m
Measurement accuracy	±1/16 inch
Lock type	Switch
Housing material	Acrylonitrile butadiene styrene
Tape material	High-carbon steel
Units	m/ft/in/ft+in
Laser measurement range	Up to 40 m
Display type	2.0-inch backlit LCD display
Maximum memory capacity	20 sets
Battery type	Lithium-ion rechargeable battery
