VITURE XR Beast Glasses (size L)

When technology reaches its absolute peak, something more than just an ordinary electronic device is born—a unique experience and an encounter with the future. VITURE XR Beast (Extended Reality) is the quintessence of advanced technology, modern design, and absolute freedom of immersion. This is VITURE’s most ambitious and groundbreaking XR model, designed for those who demand uncompromising quality—both at work and for entertainment. It features an impressive, large-screen virtual display with high resolution and brightness, delivering cinema-quality visuals. A built-in camera, support for 6DoF (Six Degrees of Freedom, a 3D motion tracking system that accounts for both position and orientation), adjustable lens tint, and the absence of a built-in battery ensure convenience and broad compatibility. An elegant metal design and eye protection round out the package—this is a complete, meticulously refined XR solution that redefines the concept of immersion.

A screen that’s ahead of reality

The headset offers a 173-inch virtual screen suspended in front of you at the perfect distance of 3 meters, ensuring excellent visibility regardless of the activity you’re performing. The 1200p image with a 120 Hz refresh rate and brightness of up to 1250 nits delivers an experience comparable to 4K quality. This is the result of using the latest Sony panels and VisionPair™ technology, which allows you to adjust the displayed image to your preferences. The absence of glare, distortion, and blurred edges makes the screen literally “disappear,” allowing you to immerse yourself in the content like never before.

Sound rich in detail

An incredible visual experience is just part of what the VITURE Beast has to offer. Sound co-created with HARMAN is 3DoF (Three Degrees of Freedom) spatial audio, which responds to head movement and lets you experience every scene, every note, and every detail with a new level of realism. Wirelessly, without interference, and with the precision you expect from top-tier audio systems.

Premium ergonomics in a metal frame

Every element of the design has been refined with maximum comfort and long product life in mind. The combination of aluminum and magnesium in the frame guarantees not only low weight but also high damage resistance and an elegant, premium look. The Large model is designed for users with a wider interpupillary distance (IPD), offering an IPD range of 68.0 ± 6.0 mm, which translates to a precise fit and comfort during use.

Technology that works for you

VITURE Beast offers full support for 6DoF in the SpaceWalker app, allowing for precise tracking of movement in space and expanding the boundaries of interaction. The front RGB camera (Red, Green, Blue; the primary colors of light used to generate images in digital systems and cameras) enables basic spatial tracking, and thanks to dynamic dimming control, you can adjust the lens tint level (9+ levels) to your surroundings—from a bright room to full immersion in the XR world.

Your screen, your style, your rules

The VisionPair™ system allows you to adjust the screen size, position, and angle to your preferences. Choose from five color modes, control brightness and volume on a 9-step scale, and adjust the viewing axis—all from an intuitive interface. VITURE Beast are glasses that listen to you, not the other way around.

The future in your hands

Use the SpaceWalker app, available on Windows, macOS, Android, and iOS, to transform the way you consume content. Watch movies on multiple screens simultaneously, enable ultra-wide mode, and, thanks to artificial intelligence, activate real-time 2D (Two-Dimensional) to 3D (Three-Dimensional) conversion—the world’s first XR glasses to offer this capability. Technology that was once just a promise is now becoming a reality.

Instant operation without charging or setup

VITURE XR Beast works immediately after connecting to a compatible device via a USB-C port, which handles both data transfer and power. This keeps the design lightweight, allowing users to enjoy the glasses without interruptions for charging or complicated setup. This solution enables convenient connectivity with a wide range of mobile devices, computers, and consoles, eliminating the need for additional power sources and simplifying the entire user experience.

Compatibility and Technical Requirements

The VITURE XR Beast glasses are compatible with USB-C devices that support DP Alt Mode (DisplayPort output via USB-C), including laptops and select smartphones. However, for Apple devices, special attention should be paid to limitations—the iPhone 14 and iPhone Air models are not supported. To ensure proper operation, check your device’s specifications for support of DisplayPort over USB-C or Thunderbolt 4, and contact the manufacturer if in doubt. It is also important to note that not every device offering DP Alt Mode provides sufficient performance for 3D mode—the full experience requires a video output with a resolution of at least 4K, and some models, such as the Google Pixel 8 and 9 series, do not support 3D mode. Additionally, compatibility may be affected by regional differences and software updates, while the use of accessories such as the Neckband, Mobile Dock, HDMI XR adapter, or USB-C XR power adapter allows you to expand connectivity options and increase the range of supported devices.

A+ Eye Care

A+ Eye Care

Ensure comfort and safety—SGS A+ Eye Care technology (certification granted by the international SGS – Société Générale de Surveillance – confirming the highest level of eye safety during prolonged use of displays) reduces eye strain even during hours of use, while axis adjustment and IPD customization allow you to fully tailor the device to your individual needs. VITURE Beast is the definition of modern technology, sophisticated design, and unlimited possibilities. Ready to discover a new dimension?

Included

- XR glasses (size L)
- frame for prescription lenses
- 3x interchangeable nose pads (sizes 1, 2, 3)
- USB-C to USB-C cable (1.2 m)
- glasses case
- protective cover
- cleaning cloth
- user manual

Manufacturer	VITURE
Model	Beast
Diopter adjustment	None
Audio system	HARMAN AudioEFX
Speakers	Built-in surround sound
