

Uni-T UT337A Carbon Monoxide Tester

Model: UT337A

Manufacturer: UNI-T

EAN: 6935750533710

Product Code: 878391

R2,510

Uni-T UT337A Carbon Monoxide Tester

The Uni-T UT337A Carbon Monoxide Tester is a portable device for detecting CO concentrations in the range of 0-1000 ppm, with a response time of less than 60 seconds (for a 90% reading), allowing for real-time monitoring of gas levels in the environment. The device uses an electrochemical sensor that features an automatic test function and user-calibration capability, making it easier to ensure the accuracy of readings. The simultaneous display of current and maximum concentrations, along with the ability to set audible and visual alarms, allows for quicker detection of threshold exceedances. The backlit LCD screen improves the visibility of results, and the Data Hold function allows for convenient checking of values without the need to constantly watch the display. Zero point adjustment along with temperature compensation ensures measurement accuracy under various conditions, and the choice of °C or °F units allows the device to be adapted to the user's preferences. Additionally, the low battery indicator and auto-off function assist in daily use.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Included

- Uni-T UT337A Carbon Monoxide Tester
- AAA batteries
- User manual
- Blister packaging

Manufacturer	Uni-T
Model	UT337A
CO measurement range	0-1000 ppm
Accuracy	±5% or 5 ppm
Resolution	1 ppm
Response time	60 s (90% of reading)
Sensor type	electrochemical (CO)
Sampling method	Diffusion
Additional features	Max Hold, Data Hold, audible and visual alarm (adjustable), auto-off
Power supply	4 × AAA 1.5V
Dimensions	197 × 54.8 × 33.8 mm
Weight	140 g
Certifications	CE, RoHS
