Uni-T LM1000G Laser Rangefinder

The LM1000G laser rangefinder is a compact device designed for accurate measurements both on the golf course and in the field. It allows you to quickly determine distance, angle, elevation, and speed, which translates to greater control and confidence in your performance. The golf mode with flag lock and trajectory compensation makes it easier to accurately estimate distance and plan your shots better.

User comfort and practical features

The LM1000G model is equipped with 6x optical magnification and a clear LCD display, making it easy to read results in various lighting conditions. The vibration function indicates when the target has been correctly locked on, making the measurement more reliable. Diopter adjustment allows you to tailor the image to your eyesight, and the sturdy construction and lithium battery ensure the device performs well during heavy use.
