Model: B09VL46P6R

Manufacturer: NEEWER

EAN: 6921268812591

Product Code: 878548

R3,698

Neewer TP-M200 200 cm tripod

The Neewer TP-M200 is a sturdy aluminum tripod with a maximum working height of 200 cm, designed to work with cameras and camcorders weighing up to 8 kg. It is equipped with an oil head, a quick-release coupling with 1/4" and 3/8" threads, a level, and double metal legs with a Flip Lock system. The design allows smooth panoramic movements and precise angle adjustment, and the whole thing is designed to be transported in the included bag.

Stability on any surface

The 70mm diameter bowl-type base makes it easy to level the head on uneven ground. The tripod's legs are made of double aluminum tubes, which translates into strength and resistance to deformation. Rubber pads on the feet provide traction even on slippery terrain, and a built-in leveler makes it easy to level accurately, which is especially important when working on uneven terrain.

Height to suit your needs

Thanks to the Flip Lock latching system, you can quickly and precisely adjust the height of the tripod from 88 cm to a maximum of 200 cm. When folded, the product measures 91 cm, making it easy to transport.

Full range of motion head

The fluid-type fluid head allows 360° panning and -70° to +90° tilt, giving you great freedom in composing your shots. The drag mechanism is optimized for smooth camera movements, which is especially important when filming dynamic scenes. Locking knobs allow you to precisely set and lock the selected position.

Universal mounts

With a load capacity of up to 8 kg, the tripod works with a wide range of photo-video equipment. The 1/4" and 3/8" threads allow you to mount DSLR cameras, mirrorless cameras, handheld cameras, cameras with telephoto lenses, professional video cameras and camcorder sliders. The quick release coupling with a non-slip surface and release button makes it easy to safely and quickly re-clip equipment.

Includes:

- Tripod
- Carrying bag
