

Flytec 2011-5 Bait Boat, 12,000 mAh

Model: 2011-5 12000mah

Manufacturer: FLYTEC

EAN: 5907085523880

Product Code: 878852

R2,949

Flytec 2011-5 12,000mAh Bait Boat

The Flytec 2011-5 is a modern RC bait boat designed for anglers who demand maximum precision, high performance, and reliability during baiting. This model stands out for its excellent resistance to wind and waves, as well as its sturdy ABS plastic construction, making it an ideal solution for use on both calm and more challenging bodies of water. With a remote control range of up to 500 meters and a load capacity of up to 1.5 kg, it allows for precise bait placement in hard-to-reach areas.

Aerodynamic and waterproof design - stability in all conditions

The streamlined hull shape minimizes water resistance, increasing stability and control even in stronger winds. The entire structure is sealed against leaks, effectively protecting the electronics and allowing the boat to be used in various weather conditions. High-quality ABS plastic ensures durability, impact resistance, and an attractive appearance for a long time.

Two independent compartments - maximum bait control

The Flytec 2011-5 is equipped with two separate hoppers that can be opened remotely and independently, allowing for very precise bait placement at various points in the fishing area. The total capacity of 1.5 kg allows for effective baiting without the need to frequently return to shore, which is particularly useful when fishing on large bodies of water.

Hook rig attachments - even greater fishing efficiency

At the rear of the boat, there are two hooks for attaching rigs with hooks. Thanks to this feature, you can deliver not only bait but also hook-and-line lures exactly where the fish are, thereby increasing fishing efficiency and reducing the wait time for a bite.

Powerful LED lighting for night fishing

The integrated front LED light allows for comfortable use of the boat after dark and in the early morning hours. The powerful blue LED not only improves the visibility of the boat on the water but also effectively attracts fish, making it an excellent tool for night baiting.

Powerful drive with dual motors and three-blade propellers

The Flytec 2011-5 is powered by two high-performance 390-class brush motors, which provide high thrust and stable maneuverability. The three-blade propellers ensure smooth operation, and the protective guards effectively prevent aquatic vegetation from being sucked in, allowing the device to remain fully operational in overgrown or polluted bodies of water.

Intuitive controls and long-range remote

The Flytec remote control allows for intuitive operation of all the boat's functions—from steering and speed control to the independent opening of both bait tanks. A range of up to 500 meters and a stable signal ensure full control even at long distances. The remote is powered by four AA batteries (not included).

Convenient to use and ready to go

Thanks to its comfortable handle and compact design, the boat is easy to carry and transport. The waterproof battery compartment allows for the safe storage of two batteries, providing up to 2 hours of operation when fully charged. The battery charging time is approximately 4 hours. A three-level LED indicator shows the charge level, allowing you to better plan your time on the water.

Included

- Bait boat
- Remote control
- Battery
- Battery charger
- Spare propellers (2 pieces)
- Spare propeller guards (2 pieces)
- Spare antenna
- Adapters and mounting accessories
- User manual

Manufacturer	Flytec
Model	2011-5
Color	Black
Material	ABS
Control frequency	2.4G
Control range	up to 500 m
Battery capacity	7.4V 12,000 mAh
Operating time	up to 2 hours
Charging time	approx. 4 hours
Weight	1926 g
Dimensions	55 × 27 × 17 cm

Remote control power supply 4 × 1.5V AA batteries (sold separately)
