R3,327

AMZCHEF SJ-036-BK slow speed juicer (black).

The AMZCHEF SJ-036-BK slow-running juicer is a great choice for lovers of fresh, natural juices. Thanks to its large 135 mm diameter opening, there is no need to cut ingredients into small pieces, which saves time and keeps your kitchen clean. The high-quality 250-watt motor enables precise and efficient juicing, minimizing oxidation, and guarantees exceptional durability and auger power for maximum juice extraction.

Triple filter for the best juice quality

The AMZCHEF SJ-036-BK is equipped with a triple filter that allows you to customize the texture of your juice to suit your preferences. The 0.8mm mesh filter provides medium consistency, the 0.5mm is perfect for clear juice, and the 2mm mesh is ideal for thicker density. This ensures that there is

something for every member of the family!

Functionality without dripping - convenience of use

The anti-drip system makes it easy to blend different types of juices, as well as keep your countertop clean. In addition, this function allows you to create vegetable milk - just add soaked nuts and water to get delicious, creamy milk. You don't have to worry about dripping after you're done juicing - the AMZCHEF SJ-036-BK is designed to always leave your workspace neat.

Impressive capacity for the whole family

The large 1.8-liter capacity allows you to prepare healthy juice for the whole family in one go. This makes daily preparation of fresh juices easy and enjoyable. The juicer is also designed with ease of assembly in mind - it consists of components such as a pusher, juice bowl, auger, power base, pulp container and juice cup, which can be easily put together in minutes.

Quiet operation and simple operation

The motor operates extremely quietly - less than 60 dB, so you can prepare juices at any time without worrying about noise. Simple operation - one intuitive button - makes the juicer ideal even for novice users. The large batch opening allows you to put larger amounts of ingredients in at one time, which keeps juice preparation time to a minimum.
