Superfire L20 flashlight, 5000lm, USB-C

Superfire L20 is a flashlight designed for people who need high brightness, long range and reliability in all conditions. With 60 watts of power and an advanced LED (Light Emitting Diode, light emitting diode), it generates an intense beam of light that is perfect for outdoor use, night patrols, rescue operations or camping. The sturdy housing, comfortable grip and water resistance make it a tool ready to work in any conditions.

Several brightness levels

The flashlight offers several modes of operation: Low light, Medium light, Strong light, Strobe, SOS (Save Our Souls, the international distress call signal) and Turbo. So you can adjust the intensity and nature of the light to suit your current needs, from gentle illumination during a leisurely walk to full power in situations requiring maximum visibility.

Comfort and durability

The ergonomic handle allows you to hold the flashlight comfortably and steer the light beam steadily. In addition, the L20 is distinguished by its IP44 rating (Ingress Protection, the standard for protection against the ingress of solids and liquids), which means that it is resistant to dust and splashes - it is not intimidated by harsh weather conditions. An additional advantage of the device is its solid aluminum alloy housing, which gives it even greater durability.

Impressive brightness and long range

The advanced 60-watt LED module and 74mm-diameter aluminum reflector provide a strong, focused light beam with high intensity and a range of up to 600m. This allows the L20 flashlight to effectively illuminate objects at a considerable distance, ensuring clear visibility in total darkness.

Long runtime and fast charging

The flashlight is powered by four 18650 cells, which provides 5 to 8 hours of operation. So you can easily take it on a camping trip, a night hike in the mountains or on patrol. The built-in USB-C port allows you to conveniently charge the device anywhere, and it takes about 8 hours to fully charge the batteries. What's more, the LED indicator shows the current power level, so you always know when it's time to plug in the charger.

Included

- Flashlight
- Rechargeable battery x4
- USB-C cable
- User manual

Manufacturer Superfire
