

MEROSS MRS100MA(EU) Smart Wi-Fi (Matter) Roller Shutter Switch (4-Pack)

Model: MRS100MAQUA-EU

Manufacturer: MEROSS

EAN: 6942349220999

Product Code: 881561

R3,043

MEROSS MRS100MA(EU) Smart Wi-Fi (Matter) Blind Switch (4-Pack)

Transform traditional blinds into a convenient smart home system that operates automatically and exactly as you need it to. The Meross MRS100MA(EU) allows you to control blinds with a power rating of up to 400 W, operating on a standard 100–240 V installation, making it easy to integrate into most homes and apartments. Support for 2.4 GHz Wi-Fi and the Matter standard ensures the device operates reliably within your existing network and works with popular smart home systems without the need for additional gateways. The package contains 4 units.

Temperature-based automation

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The device can work with room temperature settings and automatically respond to changes in temperature. In practice, this means that the blinds can close on hot days, limiting the interior from heating up, or open when the temperature drops, letting in more light and warmth. This allows you to improve comfort in your home without the need for manual control.

Schedules and timers - tailored to your day

Extensive scheduling features allow you to precisely plan the operation of your blinds. You can set opening and closing times for specific days of the week, adjust them to sunrise and sunset times, or create your own scenarios based on the time of day. As a result, the blinds operate automatically when you need them to—they can gently let in light in the morning or close completely after dark, enhancing privacy. The timer is also useful for one-time situations, such as when you want the blinds to close after a specific time, without having to remember to do so.

Remote control - full control from anywhere

Thanks to Wi-Fi connectivity, you can control the blinds no matter where you are. All you need is the app to check their current position and change settings in real time. This solution is useful, for example, when you're away—you can simulate someone being home or respond to changing weather conditions. A stable 2.4 GHz connection ensures greater range, which translates to more reliable operation throughout your home.

App and System Compatibility

The switch works with the Meross app, which is available for iOS and Android smartphones. This allows for configuration, scheduling, and remote control all from one place. Thanks to Matter support, the device can also be integrated with Apple Home (HomeKit), Amazon Alexa, and Google Home. In practice, this means that regardless of which ecosystem you use, you can control the blinds both via the app and by voice.

Stable power supply and wide voltage range

The switch supports voltages ranging from 100–240 V~, making it compatible with most electrical installations used in Europe and around the world. This allows you to connect the device to a

standard home electrical system without any concerns. The wide voltage range also ensures that the device operates stably even with minor power fluctuations, which is important for the smooth operation of the blind motor.

LED backlight

The built-in LED backlight makes it easy to locate the switch after dark. However, if you prefer complete darkness, you can turn off the backlight in the app—a simple solution that enhances comfort in the bedroom.

Manufacturer	Meross
Model	MRS100MA
Input voltage	100-240 V~, 50/60 Hz
Maximum output power	400 W
Dimensions	8.0 × 8.0 × 3.5 cm
Antenna	1 built-in
Connectivity standard	IEEE 802.11 b/g/n, 2.4 GHz (1T1R)
Wi-Fi security	WEP 64/128-bit, WPA-PSK / WPA2-PSK
System requirements	iOS 10 or later, Android 6.0 or later (HomeKit requires iOS 13 or later)
Certifications	CE, RoHS, WEEE
Operating temperature	0°C ~ 40°C
Storage temperature	-40°C ~ 70°C
Operating humidity	10% ~ 90% (non-condensing)
Storage humidity	5% ~ 90% (non-condensing)
Quantity per package	4

Connectivity: Wi-Fi, GPSR Link: https://psr-assets.innpro.pl/smarthome/sg_smarthome_controls.pdf,
Gross weight: 580, Net weight: 544, Box length: 19,00, Box width: 18,00, Box height: 5,00,
