Darkflash DS900WD ATX computer case (black)

The Darkflash DS900WD is a case designed for users who expect practical solutions. The tempered glass side panel and wooden front panel provide good visibility of the components and give the whole a distinctive look. It allows the installation of motherboards in ATX (Advanced Technology eXtended, standard motherboard format), M-ATX (Micro Advanced Technology eXtended, smaller motherboard format), and ITX (Information Technology eXtended, compact motherboard format) motherboards, which gives you a lot of flexibility when building your computer. Thanks to its spacious design and many mounting options, it ensures convenient assembly and good air circulation.

Various cooling options

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The DS900WD offers space for the installation of 12 120 mm fans or 2 140 mm fans and 360 mm or 240 mm water cooling at the top and 240 mm at the front. This allows you to build an effective cooling system for powerful configurations. In addition, the rear panel of the case features a large steel ventilation mesh for effective heat dissipation.

Well-thought-out layout and large space

The case can accommodate a graphics card up to 425 mm long and a CPU cooler up to 170 mm high. There are 7 PCI-E (Peripheral Component Interconnect Express, interface for expansion cards) slots available, allowing you to expand your setup with additional expansion cards. There is space for two HDD (Hard Disk Drive) drives or one SSD (Solid State Drive) and one HDD drive, so there will be plenty of space for games and files.

Built-in ports

The Darkflash DS900WD case is equipped with a set of the most commonly used ports, which facilitate everyday use of the computer. On the top panel, you will find one USB 3.0 port (Universal Serial Bus 3.0, a fast data transfer connector), and 2 additional USB 2.0 ports are ideal for connecting a mouse, keyboard, headphones, or other accessories. There is also an HD Audio input (High Definition Audio, high-quality audio connector) for convenient connection of headphones and a microphone.

Refined details

On the right side of the case, there is a metal mesh that not only provides adequate ventilation but also blocks larger dust particles from entering the case. What's more, the upper and lower mesh panels also protect the equipment from contamination, and their magnetic design makes them easy to install and remove.

Durable construction and stylish design

The body of the case is made of 0.5 mm SPCC (Steel, Plate, Cold Rolled, Commercial Quality) steel, which ensures high durability. The whole thing measures 470 x 218 x 454 mm and fits into standard spaces under a desk. The stylish design gives the equipment a modern look.
